

§ 82-240. Backflow prevention assembly testers. (Ord. No. B-641, § 1(7-109), 2-10-2000)

- (a) All testers operating within the city shall be certified in accordance with all applicable regulations of this state and this article. No person shall operate as a tester within the city without being certified.
- (b) At the time of certification or recertification, and at any time the director requests, each person certified as a tester shall furnish evidence to show that the person is insured and bonded to perform services on private property, has all current licenses required by the state and the city to perform the contemplated services, and is registered with the city.
- (c) Each tester who applies for registration shall meet the following requirements:
 - (1) Has a high school diploma, or equivalent;
 - (2) Has attended a backflow assembly tester certification training course and/or holds a current certification accepted by the commission, has attended a refresher course, and meets all other requirements of the state and this article;
 - (3) Has successfully passed a written and a hands-on proficiency examination that meets state requirements;
 - (4) Has successfully completed "Permit Confined Space Entry Training" as specified by the Federal Occupational Safety and Health Agency at 29 CFR 1910.146;
 - (5) Maintains general commercial liability insurance and automobile liability insurance with the following minimum limits: \$250,000.00 per person, \$500,000.00 per accident for bodily injury and \$100,000.00 per accident for property damage, or \$500,000.00 per accident if combined;
 - (6) Provides evidence to the director to establish that the applicant has available the necessary tools and equipment to properly test backflow prevention assemblies; and
 - (7) Identifies all test gauges the applicant will use in testing backflow prevention assemblies.
 - (8) Has registered with the City's designated online assembly testing results system.
