
City Council Regular Meeting

DEPARTMENT: Development Services

FROM: Michelle McCullough, P.E., CFM, Deputy Director of Development Services/City Engineer

MEETING: July 22, 2024

SUBJECT:

Receive a report, hold a discussion and provide staff direction regarding Low Water Crossings.
(Staff Contact: Michelle McCullough, Deputy Director of Development Services/City Engineer)

SUMMARY:

In June 2024, City Council requested a report on low water crossings in Burleson.

This presentation provides a definition of low water crossing, a high-level overview of the four low water crossings in Burleson, and provides a list of other flood-prone areas. The report also includes a summary of existing, pending, and longer-term options for enhancing each of the low water crossing locations.

A short-term solution for the SE Tarrant Ave low water crossing may be a grant from the Texas Water Development Board to add safety improvements such as flashing lights and additional signs. Staff anticipates notification in late August 2024. The grant application also includes safety improvements for three additional locations and may require local matching funds.
