ESRI Map Services Software

The city relies on ESRI Map Services software to operate its comprehensive map services. The software has powerful tools and features that help the city manage and analyze geospatial data, enabling better decision-making and increased efficiency across multiple city departments and services.

The following departments use the maps provided by GIS to manage their daily operations:

- Police
- Fire
- Dispatch
- Public Works
- Development Services
- Parks

A hand is pointing at a complex, multi-colored transit map, likely a subway or train network. The map features numerous lines in various colors (blue, red, green, yellow, orange, purple) representing different routes. The hand is positioned in the lower-left quadrant of the map, with the index finger pointing towards the center. The map is slightly out of focus, emphasizing the hand and the point of interest.

ESRI Map Services Software

The contract will provide us with the following for the next three years:

- Software Licensing
- Technical Support
- Software Maintenance

ESRI Map Services Software

The cost of the software will be budgeted annually under the Support Service fund, and it has been budgeted for FY 2024

Year Term	Total
Year 1	\$40,000
Year 2	\$50,000
Year 3	\$56,700
	\$146,700

ESRI Map Services Software

Staff Recommendation:

Approval of a contract with the sole source provider Environmental Systems Research Institute, Inc, (ESRI) for map services software and maintenance for three-years in the amount of \$146,700.00
