

Historical Advisory Committee BPAC Report
February 3, 2023
Submitted by Barbara Black, Historical Committee Advisory Chair

A summary of the previous BPAC meeting was shared with the members of The Historical Advisory Committee members. The members were reminded it is an open meeting and they are welcome to attend.

The cistern sign has been erected at the Russell Boren Home. Signs for the windmill, the large rock that was used in the past to sharpen blades on the farm, and the water tower are under consideration.

Historical Advisory Committee members participated in a tourism event planned by the City of Burleson. Members were greeters, docents, and guides for the event.

Tours of the Russell Boren Home were given during October (4), November (4), December (86) and January (9). Guests were from Burleson, Alvarado, China Spring Arkansas and Hillsboro.

Volunteers and members of the Historical Advisory Committee decorated the Russell Boren Home for the Christmas season. The dedicated group returned for the undecorating and packing of Christmas items. The staff of Russell Farm is to be commended for their help in assisting with the trees and storage bins.

The Historical Advisory Committee takes a winter break during January and February and does not meet. This is a quiet time at the farm. Monthly updates are sent to the members by the Chairperson. The Historical Advisory Committee will resume March 7, 2023.
