# HOW WE PURCHASE

## Purchasing

- We recommend purchasing Turn Key from Cooperative Contracts
  - The overall objective of the BuyBoard Cooperative is to provide a mechanism for all local governments in Texas to pool their collective purchasing power. The Cooperative evaluates vendor proposals on the basis of best value to the Cooperative members. As a general matter, the Cooperative makes competitive and indefinite quantity awards to vendors that give the same or better discounts/pricing than they give their best governmental clients.
- Cooperatives save money in two primary fashions: the price of the product purchased and/or in the administrative cost savings from eliminating a formal bid/proposal process.

# INSURING VALUE OF QUOTES

## Purchasing

- When using the turn key process City Staff are in control of the build before the quote is generated, this insures that we are getting a budget quote that will be very close to the purchase pricing.
- The turn key process delivers a unit ready to get working upon delivery.
- Due to the supply chain issues of the past year the ordering system for General Motors was closed in January 2021. It was opened for the model year 2022 in August of 2021 and only remained open for about 10 days. Due to the limited window for ordering vehicles letters of intent to purchase were sent out to ensure the City would be able to acquire the units needed for this fiscal year purchases.

Comparison - Jerry's in Weatherford was contacted, they could only quote 2023 new vehicles that would cost \$17,394.08 more.
