THE CITY OF BURLESON TEXAS

Department Memo

City Council Regular Meeting

DEPARTMENT: **Capital Engineering**

FROM: **Randy Morrison, PE, Director of Capital Engineering**

MEETING: **November 9, 2026**

SUBJECT:

Consider and take possible action on an amendment to the City of Burleson Wholesale Water Contract between the City of Fort Worth and the City of Burleson to allow the City of Burleson to construct a portion of the proposed Southside II Transmission Main Extension Project with the Stone Rd. / Village Creek Parkway Widening and Reconstruction Project (ST2309). *(Staff Contact: Randy Morrison, PE, Director of Capital Engineering)*

STRATEGIC PRIORITY AND GOAL(S):

Strategic Priority	Strategic Goal
Dynamic & Preferred City Through Managed Growth	2.4 Implement the city's Capital Improvement Program 2.5 Develop and maintain facilities and utility services

SUMMARY:

Since 1963 the City of Burleson has received its supply of water from the City of Fort Worth. The most recent water agreement between the City of Fort Worth and the City of Burleson has a term of January 1, 2011, through September 30, 2031. Currently, the City of Fort Worth provides 100% of the City of Burleson water and is received at two points of entry. The eastern point of entry includes the Alsbury Pump Station (856 NE Alsbury Blvd) and Industrial Pump Station (101 Industrial Park Blvd), while the western point of entry is the Hulen Pump Station (2250 SW Hulen St).

In 2023, the current wholesale water agreement was amended to increase the City of Burleson's eastern point of entry supply capacity from Fort Worth from two MGD to 13 MGD. The amendment also included the City of Burleson paying a proportionate share of the City of Fort Worth's transmission main expansion project, which is currently in the design and right-of-way acquisition phases.

The proposed amendment allows the City of Burleson to manage and construct a portion of the transmission main expansion project, that directly falls within the footprint of the proposed Stone Rd. / Village Creek Parkway Widening and Reconstruction Project. Due to the schedule of Village Creek Parkway project, the new roadway improvements would be in place prior to the transmission main being installed, and thus would require rework of the new improvements shortly after construction is complete. Therefore, City of Burleson and City of Fort Worth staff have coordinated these improvements and agreed that it is in the best interest of tax payer funding for the City of Burleson to construct a portion of the transmission expansion project ahead of the overall project.

The scope of the Stone Rd. / Village Creek Parkway Widening and Reconstruction Project is to widen and reconstruct approximately 0.5 miles of Stone Rd. / Village Creek Parkway from McCall St. to Alsbury Boulevard. The project will replace the existing two-lane asphalt roadway with a four-lane divided concrete roadway including two lanes in each direction. The project will also include curb and gutter, closed drainage systems, street lights, sidewalks, and a 10' shared use path.

RECOMMENDATION:

Consider and take possible action on an amendment to the City of Burleson Wholesale Water Contract between the City of Fort Worth and the City of Burleson to allow the City of Burleson to construct a portion of the proposed Southside II Transmission Main Extension Project with the Stone Rd. / Village Creek Parkway Widening and Reconstruction Project.
