Hello All, et al:

Thank you for contacting the Cowlitz Tribe, Cultural Resources Department, and for providing documentation of the referenced Project (McIntosh Subdivision SUB22-04)(SEPA22-22).

Based on the Report, the review of DAHP overlay, the visual inspection, and the ground SEPA efforts; we concur with the results and the recommendations to proceed. If any artifact discoveries are located please initiate the NHPA Section 106 process for Tribal guidance exercising confidential sensitivity. I can provide a brief list of monitoring recommendations:

1. The archaeological monitor will be provided sufficient workspace and an unobstructed view of excavations.
2. The archaeological monitor will have the authority to temporarily pause construction, as needed, to examine potential archaeological resources.
3. An archaeological monitor will be present for all geotechnical test pit excavations conducted in the archaeological monitoring area.
4. If project-related ground disturbance occurs in more than one location simultaneously, the proximity and rate of ground disturbance will be assessed to determine whether an archaeological monitor will be needed to adequately monitor at each location.

Please note that the recommendations in this email reflect only the Review of the Cowlitz Tribe, any other interest Tribes may have different recommendations. We expect continuing correspondence and communication on this project (McIntosh Subdivision)(SEPA22-22).

**Thank you, náx̣ẉłq̣ẉul'as (thank you)**
