SCOPE OF WORK
CITY OF CAMAS
SR 500 BRIDGE CROSSING DESIGN

The City of Camas maintains a 16-inch waterline attached to the SR 500 bridge over the Washougal River. The pipe, which serves the City's 343 Zone, is currently routed along the south side of the bridge and is supported by angle braces that are attached to the sides of the concrete box beam structure. The pipe on the bridge has developed significant leaks in recent months that have necessitated emergency repairs. Consequently, the City has decided to replace the waterline. The replacement line is anticipated to be installed on the north side of the bridge to allow the use of the existing waterline until the new line is operational, at which point the existing line will be removed. Currently, there is a gas line routed along the north side of the bridge that is abandoned.

The bridge is owned and maintained by Washington State Department of Transportation (DOT). The bridge is approximately 420 feet long and is made of concrete. It is anticipated that the pipeline design will require review and approval by DOT and will need to be designed to their applicable standards.

Gray & Osborne proposes the following Scope of Work complete the design and permitting for this project. This Scope of Work has the following assumptions.

Assumptions

1. Bridge drawings are available from DOT sufficient to allow construction drawings to be prepared showing the bridge plan view, pier construction, and bridge cross section.
2. The City will handle all DOT permitting with Gray & Osborne providing supporting documentation such as plans and details.
3. The City will obtain the necessary easements from DOT including verification that the existing abandoned gas line easement has been vacated.
4. Shorelines permitting will not be required for this project since it is considered maintenance of an existing facility.
5. The project will be constructed using a standard public bidding process.
6. Washington State Department of Health (DOH) approval will not be required.
