Subject: Municipal code 8.72

To all concerned my wife and I would like to make you all aware that we as long standing citizens of this great city we support you to only support what we have already voted on (CMC 8.72) if you allow any other option we believe you should put it to a vote of the people.

This project has taken far to long to get off the ground and you need to show some progress soon.

Thank You for your time
