Hey Neighbors	
	dard and the only non flow interruptive option. Less traffic, shorter pedestrian n the main school route. We will get the money for this in state grants it's not that bouts.
Please choose option 2.	
8B whatever we do, please do no route. It's already dangerous as is	t make it a two car drag race towards the senior housing complex. It's the major school
_	ob Hill at the main entrance. It was nice having a mildly safe street there. I walk there d business catering to children is right there too. Path to the library. Do your best.
Raised Crosswalks there across Baever my dream. Cheap too.	ay Ave and then at Fanmar/Escalona and Monterey Ave (the rail trail as it will soon be)
	We save a ton of money as a county, leaves the track area in better shape for a train. From the corridor in Capitola already. 100%ish. Why not here too.
	will get money for it. Great long term ROI on such a project these days. Plus Rail Trail is ve at least a IV there to honor the voters (minus Measure L).
8D Looks exciting to me.	
nulla trahentium per villa JM
