Lethal Ammunition	
Equipment Type: Speer Gold Dot Duty Ammunition .223 Caliber 55 grain rifle round.	
Description: Speer Gold Dot features nickel-plated brass cases and Boxer primers and is a non-corrosive round. The Gold Dot projectile goes through a process of joining the jacket and core one molecule at a time which eradicates the potential for the leading cause of bullet failure (jacket/core separation). This process will guarantee extraordinary weight retention through barriers as strong as auto-glass. Gold Dot rifle ammunition asserts remarkable accuracy with exact tolerances and unparalleled bullet uniformity.	
Quantity Owned/Sought: 5000	Lifespan: 10 years
Equipment Capabilities: Operational range 0-300 yards	
Manufacturer Product Description: SPEER LE® Gold Dot® Duty Rifle brings proven bullet technology to rifle platform. The Gold Dot® bullet was the first high-performance, bonded-core bullet available in handgun ammunition, and has since set the bar for duty ammunition. The nation's number one law enforcement option is now available in rifle ammunition for agencies everywhere. These specially designed loads bring law enforcement rifle ammunition to the next level. Gold Dot rifle bullets are optimized to ensure expansion out of barrels down to 10" at a wide variety of velocities out to 200 yards. This kind of performance greatly increases the capabilities of duty rifles and gives law enforcement personnel a distinct advantage when it matters most. In addition, these new loads boast outstanding feeding in short, very short, and standard-length AR platforms. Like their handgun counterparts, the Gold Dot rifle bullets are constructed using Gold Dot technology. The process of joining the jacket and core one molecule at a time eliminates the potential for the leading cause of bullet failure—jacket/core separation. It also ensures impressive weight retention through barriers as tough as auto-glass. In addition to being tough, Gold Dot rifle loads boast outstanding accuracy. Exact tolerances and unprecedented bullet uniformity of jacket thickness give Gold Dot rifle loads outstanding accuracy. In addition, these loads feature flash suppressed propellants and a muzzle velocity of up to 3000 fps. The versatility, reliability, and superior construction of the new Speer LE Gold Dot Duty Rifle loads allow law enforcement agencies to utilize this tested and proven bullet technology in duty rifles with complete confidence.
