

4 Phase
Fully Actuated
(Signal System: 003-05_CarolinaBeach)

NOTES

- Refer to Broadway Standard Drawings NC2017 dated January 2024 and Standard Specifications for Roads and Structures dated January 2024. The PSP can be accessed at the following website:
<http://home.tcdx.com/resources/study/Pages/NC2017.aspx>
- Do not program any of the pedestrian timing operation unless otherwise directed by the Engineers.
- Enable backup protocol for phase 2 to 3 if the controller fails to turn from phase 2-3 to phase 1-2 by progressing through an intermediate state.
- Phase 3 may be bypassed.
- Set all detectors to presence mode.
- Program pedestrian heads to countdown the existing 20 sec walk time.
- Maximum times shown in timing chart are for green operation only. Considered yellow system timing values supersede these values.
- Signal system note:

Controller Asset #0059
