Variance Considerations

The Board of Adjustment will review all variance requests against the criteria below. In the spaces provided, please indicate the *facts* that you intend to show and the *arguments* that you intend to make to the Board.

1. Unnecessary hardship would result from the strict application of the ordinance. It shall not be necessary to demonstrate that, in the absence of the variance, no reasonable use can be made from the property.

Applicant acquired property in 2020. Current structure was situated on the property. The structure as conveyed does not comply with current zoning set back requirements and lot size.

2. The hardship results from conditions that are peculiar to the property, such as location, size or topography. Hardships resulting from personal circumstances, as well as hardships resulting from conditions that are common to the neighborhood or the general public, may not be the basis for granting a variance.

At the time of the construction of the current structure, it met with all applicable zoning requirements which were in place. Those zoning requirements have now changed.

3. The hardship did not result from actions taken by the applicant or the property owner. The act of purchasing property with knowledge that circumstances exist that may justify the granting of a variance shall not be regarded as a self-created hardship.

The property owners acquired the property exactly as it exists today; and accordingly, have done nothing to create the hardship.

4. The requested variance is consistent with the spirit, purpose and intent of the ordinance, such that public safety is secured and substantial justice is achieved.

As the property ownerswill be using the same foot print; it is consistent with the spirit and purpose of the ordinance. Raising thestructure on pilings will improve public safety, as it will raise the structure above flood level and will allow for parking underneath, as opposed to the current on street parking, eliminating a safety hazard for pedestrians and motor vehicles. The new building materials will make the structure more resistant to forces of wind and fire.
