

MILLIKEN • MILL WOODS

ООВ СОН СОВА

Welcome to Milliken Mills Woods

White Pine
The white pine is commonly found up to 60 feet tall and even higher. It's full of pine needles in clusters. The white pine is Miller's native tree. The photo shows a young white pine.

Eastern Hemlock
The Eastern hemlock is a common conifer tree in Miller. It has flat needles and is much larger than the Western hemlock. The Eastern hemlock grows 60 to 70 feet tall.

Salmon Fir
The salmon fir grows up to 70 feet tall. It grows up to 12 inches in diameter. Its needles are long, flat, and smooth, and the bark is pale gray.

Red Spruce
The red spruce can grow up to 80 feet tall. It is a conifer tree with spiky needles that grow all around the branches.

Cedar
A cedar tree has flat, thin, needle-like leaves. The bark is dark reddish-brown and the ridges between the ridges are not visible on the surface.

Red Maple
The red maple grows 50 to 60 feet tall. Its leaves turn orange and scarlet in types of red in the fall. The leaves have red stems.

Red Oak
The red oak grows up to 60 feet tall. It has a long, pointed leaf. The leaves are in pairs and are 5 to 8 inches long. Red oak leaves have serrated edges.

White Oak
The white oak tree grows up to 60 feet tall. Its leaves aren't serrated like red oak. They are rounded, or oval. They occur naturally in southern and central Kansas.

Paper Birch
Paper birch has white bark. It has more rounded leaves than red oak. The bark is light gray and peels in paper-like layers. The leaves are 2 to 4 inches long and have serrated edges.

Grey Birch
Grey birch has triangular, pointed leaves. It has long, thin catkins in spring before the leaves appear. The catkins are in droops.

Lady Slipper
This lady slipper is pink and white with low leaves. It grows in forests and is rare. Don't pick it.

Blackberry
Blackberry plants are found in Milliken Mills Woods. The blackberry has leaves in a wheel or circle. In the center, it has white flowers that turn into red berries to eat.

Jack-in-the-pulpit
A jack-in-the-pulpit flower is green with a white skirt. It grows in the forest near the stream.

American Beech
The American beech can grow up to 70 feet tall. Its leaves are 5 to 6 inches long and have pointed tips. The bark is light gray, smooth, and has small, dark, horizontal lines. There is a green leafy sprout.

American Chestnut
The American chestnut is native to the region. The American chestnut can grow up to 70 feet tall. Its leaves are oval and have serrated edges. The leaves are long and have rounded tips. They turn yellow in fall.

Jack
Jack is a common tree in the woods. It has a long, pointed leaf. The leaves are in pairs and are 5 to 8 inches long. Jack leaves have serrated edges.

Purple and Quaking Aspen
Purple, or quaking, aspen, has thin, green leaves. The leaves are 2 to 4 inches long and have serrated edges. The leaves are purple in the fall. The leaves are long and have rounded tips. They turn yellow in fall.
