Message:

I am very concerned about a proposed zoning change for a large parcel of land along Route 11. The possibility of this becoming a gravel plant poses significant concerns to the quality of life for those living in this area, from environmental concerns, health concerns, and noise and smell issues. Additionally, this could cause degradation in housing values, compounding potential problems for local residents. This area is within the Crescent Lake Watershed which is vital for regional environmental and economic health. Thank you for your attention to this matter.
