Marc

I am writing to you regarding the proposal before the planning board for P&K's Application to potentially rezone their quarry operations.

I am sympathetic to the fact that a shorter term contract zone hinders their ability for a long-term planning. I am not in support, however, of increasing the size of their current operation or, in any way, making size increase easier in the future. I attended the first planning board meeting when this was discussed and also attended their public information meeting, which was well attended. At both of these meetings the public present unanimously shared this view.

In addition. I think we all agree that water quality in the greater Casco area is of vital importance. I think we should use this opportunity to ensure that we are requiring all that we reasonably can to protect this resource, which may require some changes to current practices at the quarry.

I think it is vital that this process is not rushed, and that the strong public sentiment is taken into consideration.

Thank you for your time, and I look forward to seeing you Monday night.

Best,

Amy Brown
