

April Council Update

Spring has definitely sprung! With that being said, the guys have been remaining busy. Clean-up week went as well as can be expected. We have gotten several projects started along the way.

Street Department

The Street Crew handled Clean-up week like a champ. They kept up with the demand from residents while maintaining the grass cut and brush removal. Tony and Ray assisted the inmates with the cleaning of the sidewalks & curbing on N. Main St. The crew cleaned several ditches and creek banks in the area as well. The guys also assisted the water crew with flagging during a new water line on main St. Working late to get the job completed for the day. Gravel delivery has increased with the warm weather as well.

Water/Sewer Department

The Water Crew has been busy as well. Tim & his crew installed a fire hydrant at the Randolph Water Tank and put it back in service after repairs were completed. They have been working on installing new water lines on B St. for the B. St. Project. They assisted the contract crew with repairs after a plug was hit during a manhole install. They have been a lot of Miss Utilities for the Fiber Optic lines going in around town. They have also had a couple of water line repairs, Sewer line cleans and several Graves to contend with.

Shop/Building Maintenance Department

Robert and Ray have also been fairly busy keeping up the maintenance on the vehicles and now, the tractors coming through the shop doors.

Chris is keeping things looking and running good around town. He is in the process of putting a fresh coat of paint on my office as we speak.

Nelson and his guys have the WWTP running efficiently. He is installing two new pumps at Thynedale Pump Station to replace smaller pumps that are there now.
