

FEBRUARY 2025

Public Works Monthly Update

The crews have had to change gears this past month. With favorable temperatures, things have started to pick up for everyone. More people are getting outside to start early Spring clean up. We are ready for it!

Street Department

The Street Crew was able to get out and get up a few piles of brush and leaves. They also went around trimming low hanging limbs. The guys fixed some potholes and driveways from washouts. Marvin/Josh worked on WWTP road. The crew got together and serviced all of the mowers in preparation for the upcoming grass season.

Water/Sewer Department

The Water Crew had its share of work during the warmer temps. They were able to get the water line on B St installed and service lines connected. They also installed some drain pipes to help carry some excess water away. This phase of the B St project is just about finished up and we are eagerly waiting on the next phase to start.

Maintenance Department

The guys in the shop have been busy with several Police cars. Several needed oil/filter and tire changes. We had to deal with busted hydraulic lines on several pieces of equipment. Thankfully, we were able to get the hoses replaced in a timely fashion. Ray is having to pull out a new motor and replace it due to default.

Other Updates

The WasteWater Plant is running sufficiently and things are looking good there. Chris has been keeping up on the wellhouses and surrounding buildings around town

**THANKS TO ALL OF THE GUYS FOR ALL OF THEIR HARD WORK!!! YOU
ALL ARE APPRECIATED!**
