AUGUST 2026

Public Works Monthly Update

The Shop has been put to the test this past month. Time and time again, what started off or seemed to be simple and straight forward, has turned upside down. The guys took it head on and before you knew it, the job was completed. I couldn't ask for a better group of guys!

Street Department

The Street Crew was stretched thin with the grass jumping everywhere again but were able to keep up with it. They also had a couple of projects of their own to deal with. Tony and his crew took a couple of days to go around town and got up most of the brush/debris. Needless to say, it's more out there as we speak. They crew assisted Tim and the water crew on 2 sewer line replacement & install on W. Second St., as well as the asphalting afterwards.

Water/Sewer Department

The Water Crew, with help from the Street Crew, was able to get the 2 W Second sewer lines put in and replaced in a timely fashion. All went well on the projects. They have also been working on installing the new water line on Va Ave. Jumping in & off to work on several water leaks that have popped up. They tackled 4 smaller leaks in one day, which the last one turned into the replacing of 300' water line on Bryant St.

Maintenance Department

The guys in the shop have been busy as well. They have been working on a Dump truck with many gremlins running through it. They are in the final stages of getting it tied up and back in service soon. They have had a few vehicle inspections to get and had to service several more.
The WWTP is running well. Nelson is waiting on a couple of parts for the UV lights and for the Thynedale pumps. We have signed the contract for the repairs to be done on the Oakwood Ave Pump Station. We hope to get both of those Stations running up to speed in the near future.

THANKS TO ALL OF THE GUYS FOR ALL OF THEIR HARD WORK!
