OCTOBER 2026

Public Works Monthly Update

The month ended on a good note. Va Ave water line install project was completed. Pavers came in last Monday and got the job done. It turned out very nice. Also, the shop and the other crews have been gearing up for the cooler temperatures ahead.

Street Department

The Street Crew has just about gotten finished up with grass for the season. Now, it's time for leaf season to get started. The guys took the leaf machine last week for a test run, which went well for them. Looks like it will be heavy this year so we ask that residents be patient with us on removal. They also went out on a brush and debris run as well.

Water/Sewer Department

The Water Crew was able to finally get the new water line on Va Ave completed. They had a few issues right at the end but were able to make it to the end. Project Completer. Now, on to other endeavors. THey had a ton of Miss Utilities to get marked up and catch up on. The guys went and cut/cleaned several of the sewer right-a-ways.

Maintenance Department

The shop guys have been steady at it also. Several Police cars are in need of stripping down to be sold. A few vehicles had to be inspected. A couple of tractors were in for small repairs as well.
The air tank for the WWTP came in and is awaiting an install date. Nelson was able to get one of the new pumps for Thynedale Pump Station in. It has been holding up for the most part. The wiring for the second pump has arrived and is also now awaiting installation.
Chris put a fresh coat of paint in the bathrooms at the Library.

THANKS TO ALL OF THE GUYS FOR ALL OF THEIR HARD AND CONTINUOUS WORK!
