

Public Works Monthly Update

During the last month, the guys have done their due diligence in an effort to keep things in order and moving forward. Such as continued work on helping renovate the old Wells Fargo Bank.

Street Department

The Street Crew guys have had their hands full with the leaf and brush detail. Delivering gravel and filling potholes can be added to the list as well. The crew also helped with trash pick up during the Christmas holiday. They also helped get the Yellow dump truck fitted with the salt spreader if needed during the frigid weather conditions.

Maintenance

The shop guys had a full house over the past few weeks. All three of the garbage and dumpster trucks were pulled in for service. They were able to get them back up and running in a timely fashion. Several Police cars were brought in for service as well.

Water Department

The Water Crew was focused on getting the old water lines torn out and replaced at the R.E. Lee building. They had some water leaks to contend with due to the cold weather. The last was up on N. Main St.

Other Updates

We also had three graves over the holiday. The guys stepped up and fought through the cold temperatures to insure they were taken care of. One of the pumps at Butchers Creek Pump Station had to be pulled and taken to Holland repair shop.

HATS OFF TO ALL OF THE GUYS!!!
