

NOVEMBER 2025

Public Works Monthly Update

The weather and temperatures have finally settled. We were teased with a few warm days early on but now its set on COLD!! The guys are being extra careful out there dealing with it. The work doesn't stop. Even in the cold, we were able to get some paving and tar/gravel patching done.

Street Department

The Street Crew has been out with the leaf machine the last couple of weeks when they could get out there. A few of the warmer days were spent on cutting before the frost took it out. Grass cutting is behind us now. The crew was called to help flag traffic as the area in front of Kevin's Auto was paved along with several other spots around town. They also put mulch down at the VDH building on 5th St & at the Town Office. Tony and his crew worked in the cold to get all the Christmas decorations up, as well as the tree, in time for the grand illumination and Parade on Sunday past.

Water/Sewer Department

The Water Crew has been working on parts of the B St. project. They were able to get the new water line installed on Madison St. We're waiting on test results before tying in the service lines. They have still had their share of Miss Utility tickets to mark as well. Tim and the guys also had a couple of small water leaks to repair along the way.

Maintenance Department

The shop guys have been rolling right along, keeping things moving. Several of the vehicles had to be brought in to be serviced before being inspected. They worked diligently to get dump trucks ready for the expected bad weather.

Nelson and his guys have the Wastewater Plant running up to par. They do have a slight issue with a pipe leaking in the Press room. They also had a pump go down at Thynedale Pump Station on Thanksgiving day. Replacements have been ordered.

THANKS TO ALL OF THE GUYS FOR ALL OF THEIR HARD WORK AND ENDURANCE!!! YOU ARE ALL GREATLY APPRECIATED!
