

Public Works Monthly Update

This past month, the Town Shop really stepped up to the plate with several things going on throughout the month. Everybody worked together as a team and managed to get things done!

We assisted with the set up of signs, clean-up and preparation of the Southside Fair.

Crews worked hard picking up brush and lawn debris during clean-up week. At the same time of clean-up week, they also managed to fix several graves at the cemetery. They aerated, re-seeded and fertilized the entire cemetery as well as the Pavilion grounds.

Crews removed overgrown bushes at the intersection of 92/49 (inside the island).

Installed a sign for the community garden on Endly Street.

Repaired and replaced several street lights along Main street.

Repaired damaged pump at the Thyndale pump station.
