

Voyent Alert System

Item: To authorize the Treasurer to use \$2,600.00 in contingency funds to purchase the Voyent Alert System.

Discussion:

1. The town currently has no means of mass communication with town residents and businesses in the event of an emergency.
2. A mass communication system is necessary to ensure residents are notified of emergency in a timely manner. Our current system of using social media and the town website is not sufficient.
3. The Voyent system allows residents and businesses to participate in receiving mass communications from the town if they choose too.

Recommendation:

1. Town Council authorizes the Treasurer to use \$2,600 in contingency funds to purchase the Voyent Alert System.
