

CITY OF CHIPLEY

STAFF REPORT

SUBJECT: Public Education – Lead and Copper

MEETING DATE

Tuesday, April 9, 2024

PREPARED BY

Guy Lane, Public Works Director

SUMMARY

This is a Public Education requirement from FDEP. The city completed its triennial Lead & Copper test in September 2023. Five of the twenty houses tested were above the action level for DEP compliance. The City tested the original twenty houses plus twenty more in March of 2024. All forty houses tested below the exceedance threshold.

To eliminate lead in the drinking water, the City will complete a lead service line inventory in the 2024 year. The City will also replace any lead or copper service lines found. The City will continue to test for lead above and beyond what the DEP requires. This additional testing will continue until we get two consecutive acceptable rounds of tests within a twelve (12) month period.
