News releases

• Children's Trust expands access through language service

- Website updates include an <u>accessible Strategic Plan PDF</u>, found at that menu item, the <u>organizational chart</u>, and a page for <u>capacity building</u>.

SUCCESS STORIES

Success story shared from University of Florida Saving Smiles Program

This month, we saw a 16-year-old female patient accompanied by her guardian in our Saving Smiles Program. This patient had a rare form of periodontal disease where the supporting bone around her back permanent molars rapidly resorbs due to the presence of certain aggressive bacteria. She had received initial treatment from the UF College of Dentistry Periodontics clinic which had stabilized her gum health and halted the progression of the disease. Unfortunately, the patient was unable to afford the maintenance treatment, which consisted of regular dental cleanings every 3 months. Without this treatment, the disease would likely recur, and she would be at risk of losing her back molar teeth due to severe bone loss. The Periodontics clinic referred the patient to our program, where she received a dental cleaning at no cost. She is scheduled to receive future needed dental cleanings in our program in 3-month intervals.
