

3/5/24

Please find the lease for the Bird deterrent laser. We are required to have goose deterrent for our Regional Storm Water Pond. Time is of the essence and this seems to be the most practical and expedient way to go.

This laser is not proven in our area and Outagamie County Zoning with the Airport is requiring a probation monitoring period, from the time of install to the end of the year. We have to use their Biologist Chip

Levale for the research period and cost will be up to \$12,000 on top of the Laser cost.

<https://www.wildgoosechasers.com/bird-control-removal-services/bird-control-group-lasers/avix-mark-ii/>

I am checking into the Airport approved Bird Balls, but have not received a quote. I have called them 3 times.

There is also the Goose Grid with Wire and that is roughly \$175,000, if we put a fence around, we are looking up to \$300,000.

I ask that you approve this lease, so we can get a deterrent on the pond, so we are not fined and if the laser does not do what it should, we will have to go with another method.

Thank you.
