Re: Application Package for House Move

To Whom It May Concern:

Please find the included Building (Move) Permit, Zoning Application, Building Permit, Culvert and Access Permit, Soil Evaluation Report, Signed Offer To Purchase, Zoning Support Map and Site Plan for the above referenced house move. I'm not sure if any or all of these are correct forms or not, but hopefully this will be at least sufficient for moving this project forward.

Please note, the Sanitary Permit and the Erosion Control Permit have not been obtained at this point. My Sanitary System Contractor is in the process of applying for the Sanitary Permit with the County. Per the Town's Pre-Construction Checklist these permits are not required at the time of application of the Building Permit but are required "when applicable".

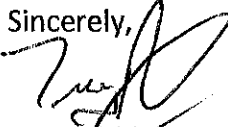

The existing 1 acre lot referenced as Parcel Number 006-000606 is currently plowed under and ready for seed. No structures exist on the property

No house plans are submitted as none currently exist due to the current existing structure being moved and retaining its existing shape and orientation when the move is completed.

As I understand it, the included Site Plan needs to be submitted to the Planning Commission and Mr. Knapinski has graciously allowed it to be added to the agenda for June 12, 2024. Please confirm that this package is sufficient to be added to the agenda for that meeting. If not sufficient, please reply with what is missing.

I expect that when this package is dropped off, only a portion of the fees will be able to be paid due to calculations needed from the Town. I will gladly pay the balance once that has been determined.

Excavation is scheduled for June 20, 2024, assistance in meeting that deadline is much appreciated. Thank you for your consideration.

Sincerely,

Troy Ribble
