

MEMORANDUM

Business Item A

From: Administrator/Staff

To: Town Board

Re: Town Board review & consideration of the project proposal for reconfiguring the Eagle Heights regional stormwater pond to meet the Outagamie Airport Overlay District requirements.

Outagamie County will not allow the bird laser system that the Town was piloting for the last year to be permanently installed as the deterrent at the regional stormwater pond. As a result, additional action must be taken to fulfill the Overlay District requirements. Administrator Wisnefske has been working on the plan to reduce the size of the pond, as well as grid the remaining portion.

The reduction of the pond's size will be in 2 distinct pieces. One portion of the pond will be filled in using the topsoil from the adjacent town-owned parcel. That topsoil was initially removed to construct the pond. Administrator Wisnefske is estimating that the cost of the fill portion will not exceed \$10,000. The remaining pond section will need goose grid with a perimeter fence. The grid item will be put to bid. The estimate received, pre-bid process, for the grid is approximately \$174,000. The Town has already budgeted \$220,000 for this project.

SUGGESTED MOTION(S):

Motion to approve the project proposal for the Eagle Heights regional stormwater pond as presented, and authorize the bid process for the grid portion.
