I would bring an unique perspective regarding the
maintenance of roads and streets within the city, as

efficient features for the community, lastly I would
focus on a budget friendlay way to plan our future's
city infrastructure.

Please provide a brief summary of your education and work experience:

I am 22 years old, I have my general education degree I'm
planning to become an architect since I invest and work on
the field, I think I could bring a good set of ideas since
I've lived in 5 different cities in Mexico, where I've seen
how public works maintain a good look for the neighborhoods
and the cities in order to be more attractive to
investments, I am eager to share my perspectives and I am
hungry to get this opportunity to show concepts of what
could be implemented here on the city.
