WHAT IS BEING ASKED OF THE CITY COUNCIL/BOARD:

City Council is being asked to consider holding a second reading of an ordinance amending the Method of Service section of the City’s Municipal Code as it relates to Property Maintenance, Nuisance and Vehicle Abatement.

From the February 16th staff report:

BACKGROUND/DISCUSSION:

Staff commonly audits the Clearlake Municipal Code and looks for provisions that are in need of updating based on best practices and compliance with the current law. Section 10-1.12 has not been updated since 2012, and should be modified so as to align with current and best practices in the City, and to be consistent with other section of the municipal code.

In conjunction with the Clearlake Police Department, staff reviewed the administrative citation appeal process and related municipal code sections and discovered some inconsistencies in 10-1.12 (Method of Service) as compared to the City’s more recently adopted Method of Service for administrative citations in 1-9 of the Municipal Code. The language in Section 10-1.12 provides for additional noticing that is not consistent with best practices and is not practical. For example, the Code currently provides that all notices are sent via certified mail. Staff recommends the City only send final abatement notices via certified mail. Such action will not impede due process and still provides the person receiving the notices with adequate and appropriate notice of the proposed actions. Moreover, the attached revisions sync with the provisions outlined in Section 1-9 of the Clearlake Municipal Code.

Environmental Considerations: Adoption of this ordinance is exempt from review under the California Environmental Quality Act (CEQA) pursuant to Sections 15060(c)(2) (the activity will not result in a direct or reasonably foreseeable indirect physical change in the environment) and 15060(c)(3) (the activity is not a project as defined in Section 15378) of the CEQA Guidelines, California Code of Regulations, Title 14, Chapter 3, because it has no potential for resulting in physical change to the environment, directly or indirectly.
