To whom it may concern,

I am writing this letter, as per an email I received from Nikki Gomez , Associate Planner, stating that the Project AR – 1902 extension will expire on August 7, 2022, due to non issued building permit.

“The expiration date is based on the original Planning Commission approval back on August 7, 2019 , the 2 consecutive 12 month extension (24 months) granted last year made the new (now) expiration date to August 7, 2022.

So now, the last and third extension request will have the expiration date of **August 7, 2023**”.

Based on the procedure stated in Nikki’s email, we need to obtain an additional extension from the Planning Department to continue the process with the building permit. On 8/3/22, we submitted plans to this department with the current planning approval extension that was granted on 11/8/21 to complete this process, and obtain building permit. I am greatly appreciate your assistance with this matter.

Please call me at (760) 272-9117. Your reply would be greatly appreciated.

Thank you,

Carlos Sanchez
