Findings for Change of Zone 18-11:

1. The Project is consistent with the goals, objectives, policies, and implementation measures of the Coachella General Plan 2035. The site has a Suburban Retail District land use designation that allows for the proposed development. The proposed change of zone is in keeping with the policies of the Suburban Retail District land use classification and the Project is internally consistent with other General Plan policies for this type of development.
2. The Project is in compliance with the applicable land use regulations and development standards of the City’s Zoning Code. The site plan proposes a highway commercial development. The Project complies with applicable C-G (General Commercial) and Parking regulations.
3. Every use, development of land and application of architectural guidelines and development standards shall be considered on the basis of the suitability of the site for a particular use or development intended, and the total development, including the prescribed development standards, shall be so arranged as to avoid traffic congestion, ensure the protection of public health, safety and general welfare, prevent adverse effects on neighboring property and shall be in accord with all elements of the general plan. The proposed change of zone is compatible with existing surrounding land uses that include the 86-S Expressway, the Whitewater Channel and rural residential homes.
4. The Project will be compatible with neighboring properties with respect to land development patterns and application of architectural treatments. The plans submitted for this Project propose a highway commercial use that is permitted in the C-G (General Commercial) zone pursuant to an approved Conditional Use Permit. Surrounding properties to the project site include agricultural land and limited single family residential land uses with scattered vacant lots. As such, the Project will be in keeping with the scale, massing, and aesthetic appeal of the existing area and future development.
5. An Initial Environmental Study recommending the adoption of a Mitigated Negative Declaration was prepared for this Project, pursuant to the California Environmental Quality Act Guidelines (CEQA Guidelines) and mitigation measures have been recommended, and

agreed to by the applicant, in order to reduce the environmental effects of the project to a level of less than significant. The Project will not have any significant adverse effects on the environment.
