

COUNCIL MEMO

MEETING DATE: October 14, 2025

STAFF: Adam Hanks, City Administrator
Brian Harmon, Public Works Director

Draft StormWater Master Plan

By contract with Branch Engineering, the City of Coburg embarked on the development of a StormWater Master Plan in 2018 with the following objectives:

- Conduct a stormwater regulatory assessment
- Provide a current inventory and assessment of public stormwater facilities with supporting location maps.
- Develop prioritized improvement recommendations with associated cost estimates.
- Conduct a comprehensive analysis of the City's current funding mechanisms and options to fund future capital projects.

The City's prior StormWater Master Plan was completed in 1999. The current draft plan builds upon the 1999 plan and provides significantly improved infrastructure review, mapping and evaluation of adequacy given the development within City limits since the 1999 plan was completed.

Attached with this cover memo are the Executive Summary(1.0), Introduction(2.0) and Regulations and Recommended Policies(3.0) sections of the overall Master Plan Document.

Staff is interested in initial feedback, questions, or requests for additional information so that can be assembled and included in the upcoming formal presentation and request for approval of the complete StormWater Master Plan at the November Council meeting.
