Coburg Urban Renewal Agency Budget Message

Elected and Appointed Members of the Budget Committee,

I am pleased and excited to share with you and the community the Proposed Fiscal Year 2025-26 (FY26) Budget for the Coburg Urban Renewal Agency (URA). The URA was created in 2001 as part of the funding strategy for the development and construction of the City of Coburg's wastewater collection and treatment system. Provision of adequate facilities and water quality were the two qualifying objectives of the URA to meet state requirements for the creation and operation of the agency with the wastewater collection and treatment facilities being the sole targeted project to address both objectives.

The Coburg Industrial Area Urban Renewal Plan provides the legal construct for the utilization of funds raised through the URA's tax increment financing revenue generation. Local Ordinance 184, adopted by the Coburg City Council on January 2, 2001, created the Agency and elected the members of the City Council as the governing body of the Coburg URA and furthermore clarified that the actions of the City Council of the City of Coburg will be the actions of the URA and not those of the City Council.

From a both financial and operational perspective, the URA has functioned in a very straightforward and direct manner in its existence with the primary function being an annual contribution from the URA's tax increment financial (means the URA) to the City (expected on the URA's tax) to the City (expected on the URA's tax).

financing (property tax generation within the URA boundary) to the City's wastewater fund that contributes to the annual debt service payments for the loan instruments executed by the City of Coburg to construct the wastewater collections and distribution system.

The URA has a legal maximum indebtedness of nine million dollars (\$9m) for the completion of the URA plan as approved. Annual debt contributions from the URA to the City began in FY 2011-12 and are currently proposed to conclude in FY2029-30 with a \$100,000 increase in annual contributions to \$500,000 for each of the next four fiscal years and a final FY30 payment of an estimated \$170,526 (fig 1).

This provides additional funding to the City's Wastewater Fund in each of the next four years with an objective of improving the fund balance position that has steadily declined over the past several fiscal years.

Also included in the proposed FY26 budget is an increase for the URA annual audit expense and \$25,000 for professional services for URA specific consulting work to prepare and provide viable options for the URA Board (City Council) to consider prior to completing the URA's \$9m financial commitment.

Adam Hanks, City Administrator
