

SUSTAINABILITY COMMISSION

AGENDA SECTION	OLD BUSINESS
MEETING DATE	07/08/2025

ITEM:	Partners In Energy Update	
DEPARTMENT:	Community Development	BY/DATE: CD Director, 07-01-25

BACKGROUND:

At the June 9th City Council meeting, the City Council received a presentation from Xcel Energy’s Partners in Energy team and City staff. Following the presentation, the Council officially approved the Memorandum of Understanding and affirmed the City’s participation in the Partners in Energy program.

On June 24th, Community Development staff met with the Partners in Energy team for a soft launch of the initiative. During the meeting, staff discussed current projects and initiatives and began outlining a work plan to guide efforts moving forward. Redevelopment staff will continue coordination with the Partners in Energy team and will meet again on Tuesday July 8th, to further develop the next steps in the process. At the upcoming Commission meeting, staff will provide more detailed updates from that meeting.

In addition to the initiative update, staff would like to begin discussions with the Commission regarding the official launch of the Partners in Energy program. Given current staffing limitations, City staff thought it best to hold off on hosting an official launch until we are back to full strength. With that being said, staff would like to have a discussion regarding the planning of an official launch event.
