textarea-1617653690382 = Columbia Academy

issue = Hearing of a youngster being hit by a motorcycle exiting a bus in another city, I'm moved to request, strongly, a new traffic control mechanism in front of Columbia Academy. When picking up or dropping off my student, I observe that frequently cars do not stop for students at or in the crosswalk.

I'd like to request a similar treatment used by St. Anthony on Silver Lake Road near their secondary school. It is a flashing light like the one in front of CA, but has a walk button for pedestrians' use, changing the yellow to a red light but only on demand. This would be preferable to either a stop sign or a semaphore that would stop traffic in a busy traffic area yet keep our young citizens safe.
