RUEKERT & MIELKE, INC.

Serving Local People. Solving Local Problems.

Good Rating Practices

- When to Do Your Ratings
 - Spring or Fall
 - Sunny Days
 - After a Rainfall (Not During)
- Verify Your MileageCertification Entries
 - 27 miles of streets

Percent of roads rated better than fair in 2015

26-59%

60-69%

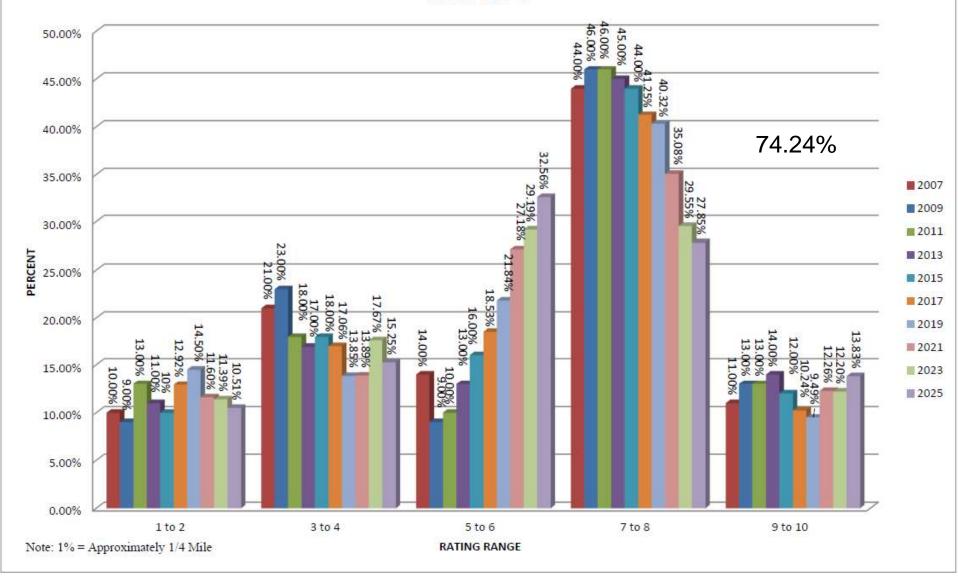

0 70-79%

80-93%

Columbus WISLR Pavement Ratings 2007-2025

Where to Spend Your Time

- New Roads (9-10 PASER)
- □ Fair Roads (5-8 PASER)

□ Poor Roads (1-4 PASER)

Types of Pavement Distress

- Surface Defects
- Surface Deformation
- Cracking
- Potholes/Patching

Surface Defects

Raveling

- Small aggregate particles have worn away exposing tops of large aggregate.
- Erosion further exposes large aggregate.

Surface Deformation

Rutting

Even slight rutting is evident after a rain.

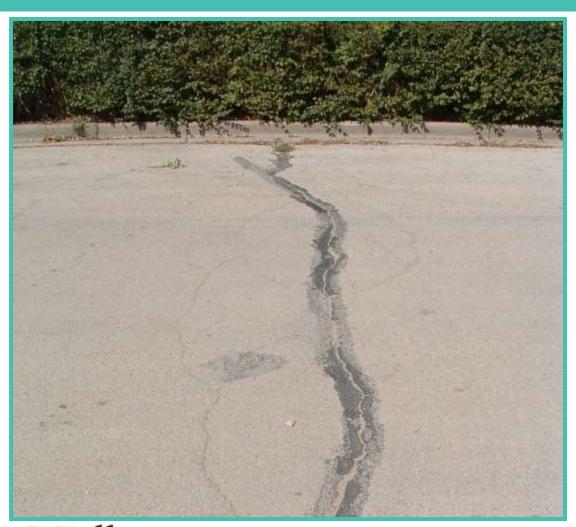

Severe rutting over 2" caused by poor mix design.

- Transverse
- Longitudinal
- Block
- Alligator

Transverse Cracks

Nuekert ⋅ Mielke

Transverse Cracks

Pavement Cracking Longitudinal Cracks

- Edge cracking from weakened subbase and traffic loads.
- First stage of wheelpath cracking caused by heavy traffic loads.

Pavement Cracking Block Cracks

- Large blocks, approximately 10' across.
- Intermediate-size block cracking, 1'-5' across with open cracks
- Extensive block cracking in an irregular pattern

Alligator Cracks

Alligator crack pattern. Tight cracks and one patch.

Potholes & Patching

Rating 10 & 9 - EXCELLENT

No Maintenance Required

RATING 10 - New construction.

Nuekert ⋅ Mielke

Rating 8 – VERY GOOD

Little or No Maintenance Required

RATING 8 - All cracks are tight or sealed.

Rating 7 & 6 – GOOD

Routine Sealing Recommended / Consider Preservative Treatment

RATING 7 - Tight and sealed transverse and longitudinal cracks. Maintain crack sealing program.

Rating 5 & 4 - GOOD

Preservative Maintenance Treatment Required / Structural Improvement Required

RATING 4 - Extensive block cracking. Blocks tight and sound.

Nuekert ⋅ Mielke

Rating 3 – POOR

Structural Improvement Required

RATING 3 - Many wide and raveled cracks indicate need for milling and overlay.

Rating 2 – VERY POOR

Reconstruction Required

RATING 2 - Extensive alligator cracking. Pulverize and rebuild.

Rating 1 - FAILED

Reconstruction Required

RATING 1 - Potholes from frost damage. Reconstruct.

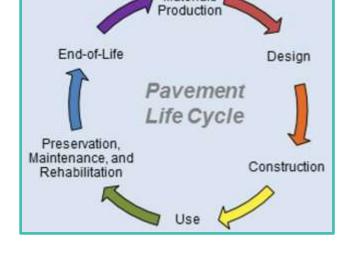

Nuekert ⋅ Mielke

Maintenance Strategies to Save Dollars

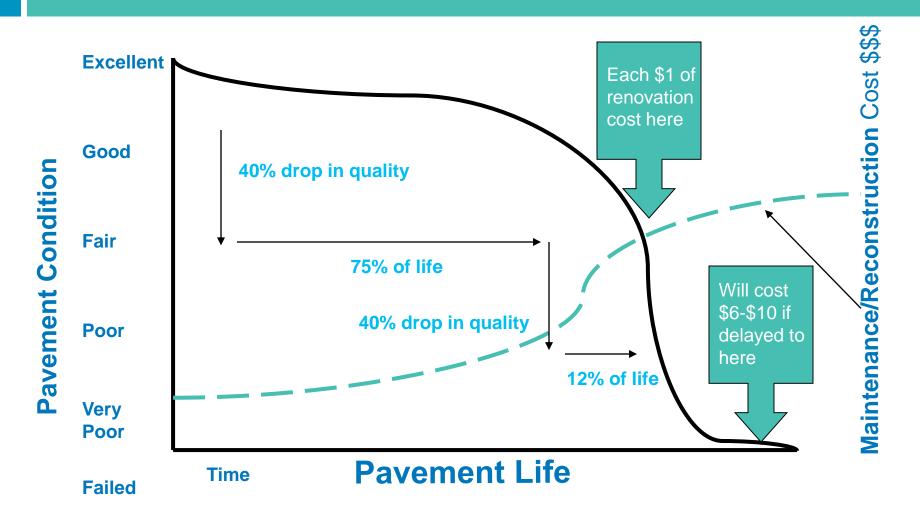

Pavement Life

- Asphalt Roads
 - 15-20 Year Minimum with a Goal to Stretch to 30 Years
- Proper & Timely Maintenance Techniques to Reach 30 Year Target
- Poor or Little Maintenance
 - Will Reduce Life Span to Less Than 15 Years

Review: Condition of Streets Pavement Life Cycle

Preventative Maintenance

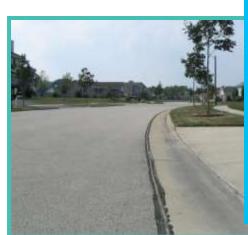

- Improves & Extends the Functional Life of a Pavement
- Done Prior to Failure
- Budget Separately for it

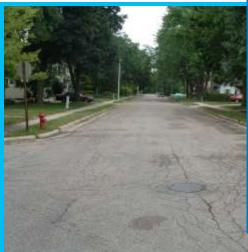

Common Causes of a Failure... ...in Asphalt Pavements

- Inadequate Drainage (Primary Cause)
- Poor or Improper Maintenance
- Base Failure

Fatigue

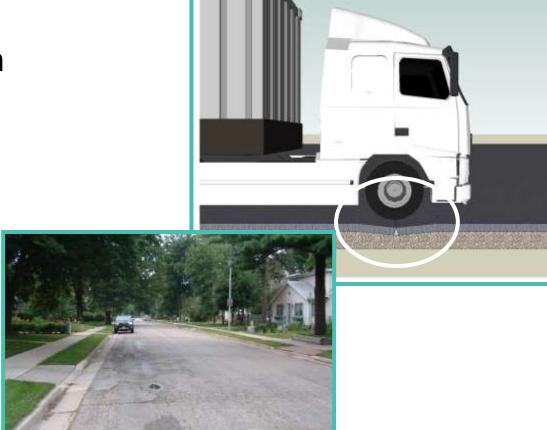

How Pavements Fail

Loading

Crack Creation

Drainage

Poor Drainage

Cost-Effective Maintenance Techniques

- Crack Sealing
- Crack Sealing
- Crack Sealing

Crack Sealing

Inadequate or Improper Maintenance

Keep WaterOut of theRoad Base

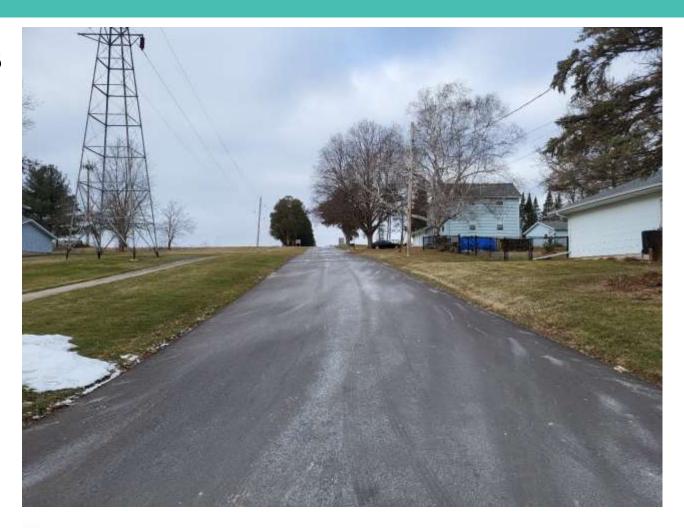

Types of Pavement Seals

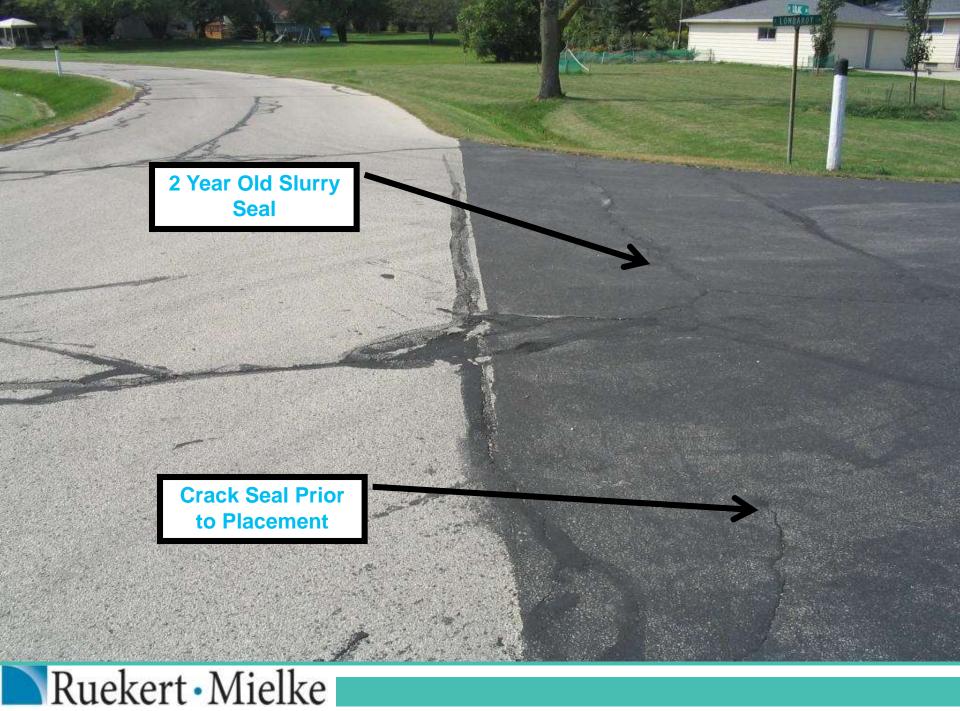

- Slurry Seal
 - Requires Road Closures (4-6 Hours)
 - Provides Non-Fading Surface
 - Subject to Plow Damage
- Chip Seal
 - Quick Application
 - Dust & Sweeping Issues
 - Potential Property Damage Claims

Other Types of Pavement Maintenance

- Overlays
- Patching
