Internal Audit of the Finance Department

December 5, 2023

AUDIT AUTHORIZATION

This departmental audit was authorized by the City Council on July 25, 2023, via an approved Council motion. The audit began on July 31, 2023, with the audit completed by the Internal Auditing Team- Internal Auditor/Compliance Officer Donna McGinnis and Forensic Auditors Ben Meadow and Jonathan Smith.

BACKGROUND

The Department of Finance strives to maintain the Consolidated Government's financial stability through sound financial and management practices. They are committed to the highest standards of accountability, accuracy, timeliness, professionalism, and innovation in providing financial services to our internal and external customers. The department consists of 32 full-time employees.

LEADERSHIP

Finance Director Angelica Alexander leads the department, accompanied by Assistant Finance Director Nicholas Clinkscales. They are augmented by divisional leadership in various functional areas. Division Manager Jody Davis heads the Accounting Division, Division Manager Yvonne Ivey heads the Revenue Division, Division Manager Andrea McCorvey heads the Purchasing Division, Division Manager Denise Brown heads the Cash Management Division and Assistant Finance Director Clinkscales additionally leads the Financial Planning Division. The Department Director reports to the Deputy City Manager of Finance, Planning & Development.

AUDIT SCOPE

The scope of the transition audit is intended to address all material aspects of the Finance Department. Material aspects included but were not limited to: a thorough review of the budgetary performance of the office for each of the last three fiscal years, as well as for the months to date of the current fiscal year, organizational structure, policies and procedures, internal controls, cash handling process, strategic planning, payroll, equipment, inventories, budgetary control, management continuity, training and participation in regional, statewide and national professional organizations.

AUDIT PROCESS

The Audit Process began with the authorization of the audit. An audit program was developed to address the material aspects of the departmental audit, followed by a phone entrance conference with the Finance Director. The audit techniques included reviews of documents and manuals, physical verification of employees and capital assets, tests of internal controls, examination of reports prepared by the department and others from independent sources, tests of transactions, reviews of policies, procedures and controls to determine if they were achieving desired results, reviews of strategic planning and capital replacement listing, interviews, meeting observations, independent verifications, and other techniques as appropriate. Following the audit, a draft report is presented to department management for review and response. A final report including the departmental response is then prepared and distributed to department management, the Mayor and Council, concurrently. A presentation to Council is scheduled to address any questions or concerns they may have and to avail it to the public. The auditor provides follow-up later to insure that agreed-to recommendations have been implemented and are properly functioning.

FIELDWORK ACTIVITIES

Fieldwork began with payroll testing in which payroll distribution for periods ended July 28, 2023, and August 11, 2023, were tested against time records and payroll system reporting and no discrepancies were noted. Activities then proceeded to each of the functional areas as noted below:

The Cash Management Team is led by Cash/Investment Officer Denise Brown and includes Accounting Technician Amber Foy. They are responsible for recording all cash in a timely and accurate manner, while ensuring that sufficient cash is available to address the City's daily needs. They additionally optimize City investment earnings by appropriate management and investment of cash on hand. In our 3-year review of budgetary performance, the division has consistently managed their budget well, with occasional challenges in Software Leases, Membership Dues & Fees, Office Supplies and Publications/Subscriptions.

The Purchasing Team is led by Purchasing Manager Andrea McCorvey and includes Buyer Specialist Della Lewis, Buyers Heather Biddle, Sandra Chandler & Patti Postorino, and Purchasing Technicians Barbara Evans & Terence Smith. This team provides professional procurement service, guidance, and assistance to City departments in obtaining goods and services. They additionally exercise ethical practices and fair competition in our dealings with vendors in areas of procurement. They also continue to strive for the most economic, innovative, and expeditious methods to achieve the City's purchasing requirements through research and staff development. In our 3-year review of budgetary performance, the division has consistently managed their budget well, with occasional challenges noted in Publications/Subscriptions and in Operating Materials.

The Financial Planning Team is led by Assistant Finance Director Nicholas Clinkscales and includes Budget/Management Analysts Shannel Davison and Jazmine Mahogany. This team facilitates the implementation, development, and execution of the budget process; prepares special financial analysis, forecast revenues and expenditures, assists our external and internal customers, and protects the financial stability of the government. In our 3-year review of budgetary performance, the division has consistently managed their budget well, with occasional challenges noted in Mobile Phones and Office Supplies.

The Revenue Team is led by Revenue Manager Yvonne Ivey, and includes Occupational Tax Supervisor Erika Tatum, Customer Service Technicians Tashalen Fears & Ebony Scott, Auditor Terrica Thomas, Collections Supervisor Allen Young and Collection Technicians Vivian DuPriest, Christiane McClellan, and Michael Wooddell. The team provides overall professional and timely management of billing, collecting, depositing, and accounting for monies due and collected for the Columbus Consolidated Government. In our 3-year review of budgetary performance, the division has consistently managed their budget well, with occasional challenges noted in Contractual Services.

The Accounting Team is led by Accounting Manager Jody Davis, and includes Senior Accountant Karen Thompson, Grant Accountant Randy King, Accountant I DeQuan Martin, Payroll Administrator Francesca Dye, Payroll Specialists Amanda Sharpe & Kaylin Ivey and Accounts Payable Technicians Crystal Funchess and Jenifer Woodard. The team maintains financial stability by providing financial services that include financial and capital asset reporting, payroll, and accounts payable to our internal and external customers in a manner that accomplishes the overall mission of the Finance Department. In our 3-year review of budgetary performance, the division has consistently managed their budget well, with occasional challenges noted in Postage and Copier Charges.

The Financial Administration Team is led by Director of Finance Angelica Alexander and includes Administrative Coordinator Glen Arrington and Financial Analyst Audrey Battle. The team strives to maintain the Consolidated Government's financial stability through sound financial and management practices and is committed to the highest standards of accountability, accuracy, timeliness, professionalism, and innovation in providing financial services to our internal and external customers. In our 3-year review of budgetary performance, the division has consistently managed their budget well, with occasional challenges noted in Membership Dues & Fees and Mobile Phones.

FINDINGS

Purchasing:

- Trained departmental financial managers continue to frequently turn in items for purchasing action that are missing key approvals, bogging down activity, with a reckoning at fiscal year-end.
- The issuance of 1098 forms to vendors at calendar year-end diverts activity for 2 Buyers from the Purchasing Team annually for several months-this is a process that can be complicated by voided vs. cancelled checks, or credit issuance.
- The volume of business activity has dramatically increased in recent years, without an adjustment to the staffing roster. Statistical review and comparison to similar sister cities supports an adjustment.

Revenue:

- There is $45.1 million of unprocessed transactional activity that is catalogued in excel records known as the CCG Lockbox. This activity has not been banked. Details appear in a supplemental attachment. Dollars represent an unrealized revenue liability in the year received. We do not have an allowance for these transactions.
- The office handles a wide variety of taxes and permit fees. In years past, renewal notices were routinely sent. More recently, such mailings no longer occur.
- Write-offs of old aged EMS receivables, along with two legally deficient loans have not been permitted for years. There is an allowance established in the General Fund, though Accounts Receivable remains overstated, and the Allowance may not currently be at an adequate level.
- Several months ago, the Collections Team had been addressing a backlog in EMS Billing-it's terrific to find them caught up to current workflow.
- As truly delinquent accounts are currently difficult to identify, citation enforcement via Inspections & Codes has been discontinued.

Accounting:

- Both CGI (Payroll) and the Advantage systems go through 3-4 "mini-conversions" annually that effectively turn the work place into a test site, where our team is identifying system glitches for the software manufacturer, which disrupts routine work flow.
- Trained departmental financial managers continue to frequently turn in items for Accounts Payable or Payroll action that are incomplete or missing key approvals, bogging down activity. Every effort is made to produce completely accurate payroll results regardless of the timeliness or quality of the submissions.
- Fixed Asset reporting may not always be current as new acquisitions and auctioned disposals may not be recorded for several months in the run up to the year-end external audit process.

- Adjusting entries are posted to revenue accounts at fiscal year-end before external auditor arrival to sweep liability balances associated with the unprocessed licensing backlog for the fiscal year.

Financial Administration:

- There is inconsistent policy enforcement of a "5-consectutive day leave" rule for Finance employees, with some complying and others not required.
- There are several key employees who are likely to retire in the coming months and years, and there is a need for a developed succession plan.

RECOMMENDATIONS

- Recommend the addition of one full-time Buyer Technician in the Purchasing Division to address increased volume of activity, as well as 1098 production.
- Recommend Accounts Payable participation in the 1098 process, ensuring a smoother processing cycle annually.
- Recommend researching public-sector ERP systems, seeking providers that are not constantly in development.
- Recommend amending W-2 document format to include all frequently sought information, thus eliminating the need for customized payroll letters for employees.
- Recommend that Revenue Division results stand at fiscal year-end, and if a liability exists, report it, resulting in accurate financial reporting.
- Recommend the development of an action plan to address backlogged transactions re: Occupational Taxes and Other Fees.
- Recommend that renewal notices be sent out to licensed businesses annually.
- Recommend that Inspection & Codes resume citation enforcement as appropriate for known delinquent accounts.
- Recommend that write-offs of aged EMS Receivables and other uncollectables take place, ensuring more accurate financial reporting.

I have received your internal audit report dated December 5, 2023, outlining some areas of opportunity to strengthen departmental policies and/or operating efficiencies in the Finance Department. After carefully considering your comments, I offer the following responses to your suggestions. Each section below addresses the areas outlined in your report.

AUDITEE RESPONSE TO FINDINGS

1. Purchasing:

Auditor Finding -

- *Trained departmental financial managers continue to frequently turn in items for purchasing action that are missing key approvals, bogging down activity, with a reckoning at fiscal year-end.*
- *The issuance of 1098 forms to vendors at calendar year-end diverts activity for 2 Buyers from the Purchasing Team annually for several months-this is a process that can be complicated by voided vs. cancelled checks, or credit issuance.*
- *The volume of business activity has dramatically increased in recent years, without an adjustment to the staffing roster. Statistical review and comparison to similar sister cities supports an adjustment.*

Auditee Response -

- The issuance of IRS Form 1099 is a function of the Purchasing Division as Purchasing is responsible for vendor maintenance and management within the financial software system. Per IRS guidelines, 1099 forms are required to be mailed no later than January 31 each year. Purchasing staff works with a third party vendor to process and mail 1099 forms before the annual deadline. After the forms are mailed, the staff handles any returned mail or corrections if applicable.
- Purchasing has facilitated the issuance of 240, 308, and 477 1099 forms for tax years 2020, 2021, and 2022 respectively. While the number of issued 1099 forms have increased in recent years due to City administered ARP grant programs, the number of returned mail and/or corrections averages to be less than 20 items annually.
- With that, the level of effort involved with 1099 form issuance/processing does not directly support additional staffing in Purchasing. However, the Finance Department's approved staffing level has always been considerably lean, and any additional positions would allow for viable backups when tenured and experienced employees resign or retire.

2. Revenue:

Auditor Finding -

- *There is $45.1 million of unprocessed transactional activity that is catalogued in excel records known as the CCG Lockbox. This activity has not been banked. Details appear in a supplemental attachment. Dollars represent an unrealized revenue liability in the year received. We do not have an allowance for these transactions.*
- *The office handles a wide variety of taxes and permit fees. In years past, renewal notices were routinely sent. More recently, such mailings no longer occur.*
- *Write-offs of old aged EMS receivables, along with two legally deficient loans have not been permitted for years. There is an allowance established in the General Fund, though Accounts Receivable remains overstated, and the Allowance may not currently be at an adequate level.*
- *Several months ago, the Collections Team had been addressing a backlog in EMS Billing- it's terrific to find them caught up to current workflow.*
- *As truly delinquent accounts are currently difficult to identify, citation enforcement via Inspections & Codes has been discontinued.*

Auditee Response -

- It is inaccurately stated that there is $45.1 million of unprocessed transactions catalogued as CCG lockbox.
- It is inaccurately stated that lockbox activity has not been deposited into the city's bank account. All transactions catalogued in excel spreadsheets referred to as "lockbox" only accounts for cash that has been deposited in the bank.
- Though requested, the referenced supplemental materials have not been provided at the time of my response which prohibits said materials from being addressed specifically.
- As of today, there are about 500+ accounts currently pending processing valued at approximately $2.5 million.
- The purpose of the lockbox spreadsheet is for staff to track payments remitted and deposited into the city's bank account by customer account number. This allows staff to process licenses over a period of time as all cannot be processed when initially received in the mail because in-person interactions are handled as a priority.
- Historically, businesses tend to wait until or close to the deadline, which is normally April 1st, to submit their license renewals. Processing thousands of licenses may typically take 4-5 months to complete.
- Our external auditors, Mauldin & Jenkins, provide audit/financial services to 650+ government clients throughout the southeast. The lockbox process has been discussed with the external auditors and they have reaffirmed that revenue is being properly recorded through our lockbox process.

- The city uses the current financial resources measurement focus and the modified accrual basis of accounting. This means that revenues are recognized as soon as they are both measurable and available.
- Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Consolidated Government considers taxes as available in the period for which they were levied if they are collected within 60 days of the end of the current fiscal period. A 90-day availability period is used for revenue recognition for all other governmental revenues. Certain revenues such as property taxes, sales taxes, licenses, interest revenue, and charges for services associated with the current fiscal period are all considered to be susceptible to accrual and thus are recognized as revenues of the current fiscal period, if available criteria are met. All other revenue items are considered to be measurable and available only when cash is received by the Consolidated Government.
- In addition, the city elected to use the gross receipts and profitability ratio methodology to assess and collect occupation taxes.
- Since occupation taxes are a derived income tax based solely on the economic activity and earnings of a business, the city cannot accurately determine what the gross receipts would be for a particular business in the preceding or ensuing year. It would be both inaccurate and misleading to make such assumptions.
- It would also be inaccurate to record an allowance for doubtful accounts for any amounts listed on any "lockbox" spreadsheet as these amounts represent cash that has already been deposited into the city's bank account.
- Renewal notices are mailed annually. As part of annual processes, the Revenue Division typically sends a courtesy delinquent letter to businesses who have failed to submit license renewals for the current year.
- It was discovered by management in August 2023 that Revenue Division staff failed to timely issue courtesy delinquent notices and subsequently turn over delinquent accounts to Inspections & Codes Department, Code Enforcement Division for enforcement.
- Since discovery, courtesy delinquent notices for license years 2020, 2021, 2022, and 2023 were mailed in August 2023.
- Ambulance write-offs occur monthly for various reasons including contractual insurance adjustments as well as adjustments for deceased, incarcerated or indigent persons. It is a policy decision to physically close out ambulance receivables in the financial system because once a receivable is closed, it cannot be re-opened, and payment cannot be posted after closure.
- Ambulance receivables are not overstated as approximately 70% of the ambulance receivable balance has been written off as bad debt and is reflected in the figure reported as allowance for doubtful accounts in the financial statements.
- Closing the receivable in the financial system would not impact the financial statements as the allowance currently reduces the receivable to a net amount. That net amount would still

be reflected in the financial statements because once the receivable is closed, the allowance would be removed.

- Citation enforcement has not been discontinued as the enforcement of delinquent business licenses is the responsibility of the Inspection & Codes Department. The delinquent business license list was turned over to Inspections & Codes on September 13, 2023, for code enforcement.

3. Accounting

Auditor Finding -

- *Both CGI (Payroll) and the Advantage systems go through 3-4 "mini-conversions" annually that effectively turn the work place into a test site, where our team is identifying system glitches for the software manufacturer, which disrupts routine work flow.*
- *Trained departmental financial managers continue to frequently turn in items for Accounts Payable or Payroll action that are incomplete or missing key approvals, bogging down activity. Every effort is made to produce completely accurate payroll results regardless of the timeliness or quality of the submissions.*
- *Fixed Asset reporting may not always be current as new acquisitions and auctioned disposals may not be recorded for several months in the run up to the year-end external audit process.*
- *Adjusting entries are posted to revenue accounts at fiscal year-end before external auditor arrival to sweep liability balances associated with the unprocessed licensing backlog for the fiscal year.*

Auditee Response -

- Interval software updates are standard practices for most software systems. Oftentimes, these updates enhance security and implement new features that may contribute to process improvements within the software system.
- To help mitigate frustrations surrounding testing requirements for new feature sets, Finance, HR, and I.T. staff are currently engaged in discussions with the financial/payroll/budget software vendor regarding the implementation of a third (non-production) database. A third environment allows the current production and non-production databases to remain on the same version of the software to quickly remediate issues that may arise while simultaneously testing any impending software updates.
- Fixed Assets are identified and reviewed on a monthly basis. However, they are not recorded until the completion of the prior year audit because our available reporting is not fiscal year specific. Unfortunately, we cannot post new assets in the new fiscal year until the prior fiscal year audit is complete.
- Once the audit is complete and the prior fiscal year is closed, all assets are recorded and are continuously recorded on a monthly basis up to year end.

- As stated previously, the lockbox process has been discussed with our external auditors, Mauldin & Jenkins, and they have reaffirmed that revenue is being properly recorded by the Accounting Division through this process.

4. Financial Administration

Auditor Finding -

- *There is inconsistent policy enforcement of a "5-consectutive day leave" rule for Finance employees, with some complying and others not required.*
- *There are several key employees who are likely to retire in the coming months and years, and there is a need for a developed succession plan.*

Auditee Response –

- Finance department employees do adhere to the 5-day mandatory leave policy. However, due to staffing challenges in the Revenue Division, it was the decision of management to allow an employee to forego the 5-day leave requirement during the pandemic. However, all employees will resume their mandatory leave now that additional staffing has been temporarily approved to assist with the backlog in the Revenue Division.
- While the Finance department has succession plans in place for certain positions, other positions may not have viable backups. This issue is not unique to Finance as this is likely the case for key positions in most departments throughout the city government.
- To properly develop talent requires time and resources that most departments cannot afford to expend since succession planning is so much more than simply picking replacements. Although the city recently implemented a new pay plan, pay is still a determining factor when it comes to talent pool selections.
- Attracting and retaining individuals with the key competencies and skills necessary for business continuity is sometimes challenging when coupled with other limitations such as budget constraints.

AUDITEE RESPONSE TO RECOMMENDATIONS

AUDITOR RECOMMENDATION #1:

- *Recommend the addition of one full-time Buyer Technician in the Purchasing Division to address increased volume of activity, as well as 1098 production.*

AUDITEE RESPONSE:

- The level of effort involved with 1099 form issuance/processing does not directly support additional staffing in Purchasing. However, additional staffing is needed to implement process improvements for other functions to include full implementation of online payment processing for vendors managed by the Purchasing Division and for taxpayers regulated by the Revenue Division.

AUDITOR RECOMMENDATION #2:

- *Recommend Accounts Payable participation in the 1098 process, ensuring a smoother processing cycle annually.*

AUDITEE RESPONSE:

- The issuance of IRS Form 1099 is a function of the Purchasing Division as Purchasing is responsible for vendor maintenance and management within the financial software system. In addition to Purchasing, the Accounting Division must also ensure the issuance of thousands of mandated payroll tax forms before January 31 each year as well. While there is some collaboration among divisions to meet the annual deadlines, any additional responsibilities for vendor tax forms may be burdensome for accounting staff.

AUDITOR RECOMMENDATION #3:

- *Recommend researching public-sector ERP systems, seeking providers that are not constantly in development.*

AUDITEE RESPONSE:

- Interval software updates are standard industry practices for most software systems. Oftentimes, these updates enhance security and implement new features that may contribute to process improvements within the software system. The city has approximately 2 years left in the current contract with the HR/financial/budget software vendor. Additional options may be explored close to that time.

AUDITOR RECOMMENDATION #4:

- *Recommend amending W-2 document format to include all frequently sought information, thus eliminating the need for customized payroll letters for employees.*

AUDITEE RESPONSE:

- The W-2 document is a standard IRS form which can only be amended by the IRS. It is my understanding that staff were expressing a desire to update employee paycheck stubs to include gross year to date totals thus eliminating the need for letters from payroll that contain this information. However, this would be a significant change to the current format and there would be an associated cost to facilitate such a change.

AUDITOR RECOMMENDATION #5:

- *Recommend that Revenue Division results stand at fiscal year-end, and if a liability exists, report it, resulting in accurate financial reporting.*

AUDITEE RESPONSE:

- Our external auditors, Mauldin & Jenkins, provide audit/financial services to 650+ government clients throughout the southeast. The lockbox process has been discussed with the external auditors and they have reaffirmed that revenue is being properly recorded through our lockbox process. The city uses the current financial resources measurement focus and the modified accrual basis of accounting. This means that revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Consolidated Government considers taxes as available in the period for which they were levied if they are collected within 60 days of the end of the current fiscal period. A 90-day availability period is used for revenue recognition for all other governmental revenues. Certain revenues such as property taxes, sales taxes, licenses, interest revenue, and charges for services associated with the current fiscal period are all considered to be susceptible to accrual and thus are recognized as revenues of the current fiscal period, if available criteria are met. In addition, accrued revenue would be recorded as a receivable which is an asset, not a liability on the financial statements. The purpose of the lockbox spreadsheet is for staff to track payments remitted and deposited into the city's bank account by customer account number. This allows staff to process licenses over a period of time as all cannot be processed when received initially received in the mail because in-person interactions are handled as a priority.

AUDITOR RECOMMENDATION #6:

- *Recommend the development of an action plan to address backlogged transactions re: Occupational Taxes and Other Fees.*

AUDITEE RESPONSE:

- An action plan was provided in the executive summary report provided on October 30, 2023. However, staff are continuing to work through the license renewal and delinquent license processes. Temporary staffing has been authorized by the City Manager to assist with the backlog of license processing. Staff will continue to work overtime to complete

pending license renewals. Information Technology and Finance will continue engagement with the software vendor to address system performance issues in order to move forward with automation efficiencies to include online processing.

AUDITOR RECOMMENDATION #7:

- *Recommend that renewal notices be sent out to licensed businesses annually.*

AUDITEE RESPONSE:

- Renewal notices are mailed annually. As part of annual processes, the Revenue Division typically sends a courtesy delinquent letter to businesses who have failed to submit license renewals for the current year. This includes those businesses that did not respond to a "problem letter". If a business does not come into compliance, a delinquent list is generated for Code Enforcement to compel compliance.

AUDITOR RECOMMENDATION #8:

- *Recommend that Inspection & Codes resume citation enforcement as appropriate for known delinquent accounts.*

AUDITEE RESPONSE:

- Citation enforcement has not been discontinued as the enforcement of delinquent business licenses is the responsibility of the Inspection & Codes Department. The delinquent business license list was turned over to Inspections & Codes on September 13, 2023, for license years 2020, 2021, 2022, and 2023.

AUDITOR RECOMMENDATION #9:

- *Recommend that write-offs of aged EMS Receivables and other uncollectables take place, ensuring more accurate financial reporting.*

AUDITEE RESPONSE:

- Ambulance write-offs occur monthly for various reasons including contractual insurance adjustments as well as adjustments for deceased, incarcerated or indigent persons. It is a policy decision to physically close out ambulance receivables in the financial system because once a receivable is closed, it cannot be re-opened, and payment cannot be posted if received after closure. Ambulance receivables are not overstated as approximately 70% of the ambulance receivable balance has been written off as bad debt and is reflected in the figure reported as allowance for doubtful accounts in the financial statements. Closing the receivable in the financial system would not impact the financial statements as the allowance currently reduces the receivable to a net amount. That net amount would still be reflected in the financial statements because once the receivable is closed, the allowance would be removed. Nevertheless, a policy revision regarding closing receivables will be reviewed for consideration.

Sweep & CCG Lockbox Entries in Advantage

Whose $45.1 million was it?

Details for FY19-FY23 at 10/28/23

FY19	$7,768,539.00
FY20	$3,705,880.52
FY21	$8,666,160.18
FY22	$12,102,474.43
FY23-	$12,951,064.85
Total	$45,194,118.98

Tool Kit Summary Notes

Shortly after this internal audit was authorized on July 25, 2023, the Internal Audit team received a 5-Year Occupational Tax Collections Summary from legally protected whistleblowers. The Summary data is fluid, but our data was secured on July 28, 2023. As noted, $82,053,382.46 was collected over the most recent 5-year period (FY19-FY23), however only 44% or $35,975,160.25 was worked. By worked, it means that the business customer paid taxes or fees and in return, received the business license or permit that they were seeking for the correct period. Most of these completely satisfied customers had a history of appearing in person at the Revenue Division office. The unworked volume totaling $46,078,222.18 is generally returns and payments that had been mailed into the Revenue Division office. Of these unworked transactions, most involved business checks that had never been deposited at Synovus Bank, and after 90 days, the checks were no longer eligible for deposit. In some other cases, the tax or fee payment was to be charged to a debit or credit card with written authorization instructions provided by the business owner, and in the unprocessed backlog known as the CCG Lockbox, the written credit card authorization was never processed. There are also a couple of other examples within unworked activity- situations in which payment was processed, without a business license or permit issued, and a few situations in which the license or permit was issued, but the payment was never processed. Unworked activity is not recorded completely in the licensing software, which results in a lot of Excel spreadsheet activity.

Each year, in late July or August, the Revenue Division Manager sends an Inter-Office Memorandum to Karen Thompson of the Accounting Division requesting journal voucher entries to reclassify and sweep balances of this activity from unrealized liabilities for Sweep & CCG Lockbox, ahead

of the arrival of external auditors for year-end audit fieldwork. By reclassifying these unrealized dollars to revenue accounts in the General Fund's Government Wide Revenue Department, we are presenting deceptive information in our Occupational Tax, and Other Business Taxes accounts, as dollars reclassified represent intended transactions that are supported by invalid stale dated checks. In your support, you'll see several of the requested transactions reference numbers from the unworked cells on the July 28, 2023 summary document.

Lastly, on October 28, 2023, we received detailed log records for the period FY19-FY23, showing exactly which businesses remain in the backlog of unprocessed, unrecognized tax or permit filings or renewals. When comparing results between July 28, 2023 and October 28, 2023 it's clear that the backlog is fluid with a net improvement of over $884k resolved. Every day, additional bundled mail joins the backlog, while a few items hopefully get resolved. FY24 backlog continues to grow daily. FY20, the Covid year was comparatively a bright spot, likely because the workplace was closed to taxpayers, while employees were on site considered essential personnel. Without customer interruption, more work was successfully completed. In reviewing the trend over the most recent 5-year period, it's clear that the unworked, unprocessed backlog is worse in our most recent years, with an escalating trend.

The 5-year detail at the DBA identity level is provided , as our elected community leaders are fielding many inquiries from local businesses, and it's believed that information is power, and will be beneficial as we try to assist our concerned citizens.

Upon review, if you have any questions, please reach out to the Internal Audit team.
