- 1. Strategically link building & site to the broader mission of the Colusa PD.**
Establish physical and visual connections to Route 22 and the new road to the North, and to Colusa more broadly.
- 2. Contextualize while fostering a secure facility.**
Integrate hard-boundary security elements with contextual sensitivity & design to create a strong civic expression
- 3. Incorporate landscape holistically with architecture & site conditions.**
low-maintenance, sustainable materials that aim to minimize negative effects on the environment.
- 4. Develop logical programmatic & spatial arrangements:**
 - Defined, separate entries for public & staff.
 - Public areas accessible from the lobby & in front of secure access points.
 - Internal arrangements with respect to noise & sensitive material

- 5. Prioritize security.**
Secure site perimeter with tiered interior levels of access.

- 6. Prioritize ventilation & thermal comfort as required by rooms.**
Consider all HVAC specific needs related to police staff and police-related business

- 7. Plan for immediate needs and for future growth.**
Plan for dedicated storage and future growth

- 8. Design a meaningful station that will serve for generations to come.**
Incorporate feedback from Colusa PD staff, City staff, and stakeholders to maximize the efficiency of the new police department and its connection with the existing & future physical and social contexts.
