

City of Colusa California

STAFF REPORT

DATE: March 9, 2022
TO: City Council
FROM: David Swartz, PE, PLS, City Engineer

AGENDA ITEM:

Subject: Water Park Splash Pad – Equipment Purchase

Recommendation: Council to approve the purchase of the equipment direct from Water Odyssey via the State Contract Purchase Agreement through OMNIA.

Recommendation: Council to adopt Resolution No. _____ authorizing the purchase of the water park splash pad equipment through Water Odyssey, via the state contract purchase agreement and waiving the formal bid requirements for the equipment purchase only.

BACKGROUND ANALYSIS: The City has received grant funding in an amount of approximately \$177K for the installation of a waterpark splash pad feature that is currently out to bid. This water feature is planned to be constructed next to the city swimming pool. The water park splash pad itself (concrete pad), underground plumbing, site electrical, grading and other work is currently out to public bid. However, the equipment it's self is very specific and specialized and custom made for this specific project, and as such, competitive bidding provides no advantage to the project and likely could end up resulting in higher costs. Water Odyssey, via a company located in Sacramento called All About Play, has a state purchasing contract through OMNIA, which is a preapproved state vendor for direct purchase. Thus we have set the project up such that everything that is "not" custom is being bid competitively.

BUDGET IMPACT: Grant funds up to \$177K

STAFF RECOMMENDATION: Approve the attached Resolution.
