**Permits are not included in cost, unless specifically listed in pricing.** If permits are required Signed/Sealed drawings are needed and are also not included unless specifically listed in pricing. Any costs for municipal permits, paid by installer, will be charged back to the owner. Adding permits to any job will increase the length of completion, expect total time to be about **150 days**, after receipt of Site Plan from owner/customer (this is not due to manufacturing but rather the permit process at the municipality level). It is expected that the **owner will provide approved site plans** of the area for the permit office, and will help and assist in the securing of all required approvals before assembly of equipment can begin. Installer cannot provide site plans. **The permit process can not begin until appropriate and current site plans are provided by owner.** If there are no current surveys or site plans available, the owner may be required to obtain a new survey for the permit. This is the responsibility of the owner to obtain. If additional permitting requirements are needed during the process, those will be added and billed accordingly, i.e. soil density test, formed footers, etc.
