TO: Mr. Akin Ozaydin
Cooper City Utilities Director/City Engineer

FROM: The Rock Creek, Inc. Board of Directors

RE: Letter of Support for the design and construction of Hiatus Road Traffic Safety Improvements as per the three-page plans submitted to our Board for review

Please be advised that the Board of Directors are providing this letter of support as per the "Hiatus Alternative Traffic Calming", drawings labeled Pages numbered one, two, and three as prepared by the Corradino Group and dated February 27, 2026. A set of the drawings are attached and part of the "Letter of Support".

The three page plans presented include:

a) Reduction in speed limit from 40 to 35 MPH
b) Solar powered speed limit signs
c) A patterned non raised pavement at the intersection of both the Embassy Lakes entry road, North East lake Blvd., and Hiatus Road where the previous offering included a "round about", which is no longer is part of the plan
d) Concrete traffic separators
e) Long speed tables to the north and south of the intersection, raised three inches

As we believe that the combined traffic calming plans will both support the safety of our residents while maintaining effective traffic flow, the Rock Creek, Inc. Board of Directors is pleased to support the plans as presented to us.

Ron Choron, President
Rock Creek, Inc.
