BACKGROUND OF ITEM:

Bill Lips Sports Complex has a low-volume irrigation system that is not effective for maintaining high-quality athletic fields. It is standard for athletic field irrigation systems to be capable of maintaining high-volume water output to ensure proper turf coverage and consistent & conservative water management. The current infrastructure limits the fields' ability to sustain durability, maintain consistent turf quality, and provide a safe playing surface for our users. Renovating the irrigation infrastructure at BLSC Multi-Purpose Fields will give us the best opportunity to maintain our turf well into the foreseeable future, maximizing the ability to preserve the condition of the multi-purpose fields for our programs and community.
