Ground monument sign examples with ***new proposed code***. Signs have a <u>matching background color on tenant panels</u>, but <u>lettering can match the center sign package colors and approved trademark logos.</u>

Ground monument sign examples limiting tenant panels to a single color lettering and matching backgrounds. *More restrictive than new proposed code* changes but results in a very "uniform" look.

Ground monument signs allowing tenant panels to have <u>different color lettering</u> and <u>different color backgrounds</u>. Examples are very "flexible" for the centers but do not have any sort of uniformity and look more "distracting" to drivers.
