The Bidder shall be in default of the contractual obligations if any of these documents are not submitted in a timely manner and in the form(s) required by the City. If the Bidder is in default, the City, through the Purchasing Division, will void its acceptance of the Bidder's offer and may determine to accept the offer from the second most responsive, responsible Bidder or re-solicit Bids. Any lapse in coverage shall be considered breach of contract. In addition, Contractor must provide to the City confirmation of coverage renewal via an updated certificate should any policies expire prior to the expiration of this Agreement. The City reserves the right to review, at any time, coverage forms and limits of Contractor’s insurance policies.

The Contractor shall provide notice of any and all claims, accidents, and any other occurrences associated with this Agreement shall be provided to the Contractor’s insurance company or companies and the City’s Risk Management office as soon as practical.

5.3. BACKGROUND

The City of Cooper City is a municipal corporation created by a Special Act of the Florida Legislature on June 20, 1959. Cooper City was founded by Morris Cooper who was able to turn a few acres of orange groves and cattle grazing land into a stable and beautiful community.

Located approximately 15 miles southwest of Fort Lauderdale, this 8.5 square mile bedroom community has the fourth highest median household income in Broward County. With an estimated population of 34,401 in 2020, the average age of all residents is approximately 40 years old.

With three public elementary schools, one middle school and one high school, as well as several private, charter and religious affiliated schools, an abundance of parks, recreational facilities, and programs for all ages, Cooper City has long been known as an excellent place to “grow families”.

Through the cooperative efforts of neighbors, businesses, and local government, Cooper City has evolved into a City that offers the best of all worlds – an attractive business environment and an outstanding quality of life for neighbors. The City of Cooper City is most well known for being *Someplace Special*, the successful proposer will integrate the City-wide slogan into this departmental master plan.

To attain National Parks and Recreation Association (NRPA) accreditation status, the Parks and Recreation Department must comply with CAPRA Standards for national accreditation, which are based on compliance with 151 standards. The process is a rigorous endeavor involving the assessment of the Department’s functions, activities and programs. Hundreds of documents are collected and compiled to demonstrate compliance with each standard. The Parks and Recreation Master Plan is a primary component of the documentation required for CAPRA accreditation.

This Master Plan should build upon previous comprehensive planning efforts such as the Parks and Recreation Element of the Comprehensive Plan. The Parks and Recreation Master Plan should consider parks, open space, corridors, public place, recreational facilities, and programs as the “park system.”

The Comprehensive Parks and Recreation Master Plan should include the following components:

1. Department Mission Vision and Objectives
2. Community Inventory and Assessment
3. Needs Assessment
4. Level of Service Standards
5. Parks and Recreation Strategic Plan
6. Recreation Trends Analysis
7. Recreation Programming Plan
9. Community Relations and Marketing Plan
10. Community Health and Environmental Responsibility Plan
11. Art in Public Places Plan

Department Mission Vision and Objectives

The consultant shall undertake a review of the Department’s existing mission, vision, objectives and core values. These shall be incorporated into the final Master Plan.

Community Inventory and Assessment

The consultant shall update the existing park system inventory within the City of Cooper City boundary and surrounding area.

The inventory shall include program elements, services and physical resources in the community to determine overlapping areas, areas of insufficient activity, and areas of omission or inadequacy. Priority must be placed on synergistic service delivery, partnership opportunities, as well as strategies to increase revenues.

The profile should identify parks that are owned and operated by the City, as well as other public agencies within the City's limits. This shall include contact information, programs and services offered, areas and facilities operated, of schools, public agencies, nonprofits and private enterprises.

A. Inventory and Assessment: Social Service and Recreation Programs and Services

1. Inventory available social service and recreation programs, recreation facilities, and related services: conduct a complete inventory of all agency facilities, programs and services, as well as alternative providers in the community.
2. Evaluate existing and projected levels of social service and recreation program services and determine adequacy of current social service and recreation opportunity for City residents and visitors.
3. Review and discuss existing funding mechanisms and cost recovery practices for recreation programs and services, and recommend appropriate levels of cost recovery through fees. Recommendations must balance cost recovery with issues of affordability.

B. Inventory and Assessment: Parks System Resources

1. Describe the inventory and conditions of existing parklands and other recreation facilities.
2. Work with staff and community to identify and define immediate needs and desired improvements within existing developed parks and greenways.
3. Evaluate community access to parks, facilities and services; establish local planning guidelines and standards for adequate access to recreation facilities and parks (consider park types i.e.: neighborhood community regional as well as greenways and open space); prepare an analysis of existing and future neighborhood areas, projected service populations, and parkland allocation recommendations within the urban boundary based on growth, transportation, and safety; identify and discuss current and anticipated access issues including barriers to participation; make specific recommendations addressing and future needs including parkland acquisition and development.
4. Identify, inventory, and rank unique natural and other open space resources for potential park system acquisition and/or parks development opportunity within the community.
5. Identify redevelopment opportunities within the existing community for potential park development.
6. Provide recommendations as needed to define acquisition priorities and accomplish parks system Master Plan goals implementation schedules toward establishing an integrated network of park resources and facilities within the fiscal limitations of the community.
7. Review Cooper City's planning, zoning and economic development ordinances pertinent to parks development issues; propose amendments and/or new ordinances as needed to accomplish parks development goals and objectives.

C. Funding:

1. Provide a thorough analysis of existing funding practices, sources of funds, and funding levels for both “parks and facilities” and “social service and recreation programs and services.”
2. Project short-term and long-range funding levels required to support Master Plan goals and objectives relative to anticipated growth, development and long-term maintenance; describe methodologies and models used to determine projected costs.
3. Identify new or alternative sources of funds that might reasonably be developed to supplement existing funding methods; identify and discuss new funding practices that might present long-term funding stability.
4. Recommend long-term funding strategy(s) that combines and incorporates a diversity of funding options and techniques that will effectively support and achieve Master Plan goals and objectives for both parks development and recreational services.

D. Comparative Analysis:

1. Compare findings and recommendations for the City of Cooper City recognizing national and state standards, as well as adopted “levels of service” from like communities in Florida.
2. Citizen input gathered through public participation efforts must be taken into consideration when developing the Parks and Recreation Master Plan.
3. Propose parks, recreation, and open space recommendations that are progressive while remaining prudent for communities with like resources.

Needs Assessment

Living close to parks and other recreation facilities is consistently related to higher physical activity levels for both adults and youth. An analysis of the needs for future park, recreation, open space, facilities or programs shall be conducted. The consultant shall also develop recommendations for meeting those needs.

1. Develop strategies and information needs with staff, then prepare and conduct a statistically valid community-wide needs assessment (including public opinion profile) and other public input surveys to determine current interests and levels of park use, future parks development needs and interests, public priorities and willingness to support different funding levels and funding options now and in the future; identify and discuss major issues/concerns specific to the City of Cooper City.
2. Conduct a statistically valid community-wide needs assessment addressing population shifts and changing social and economic conditions (can be combined with parks assessment) to determine current levels of participation and public satisfaction with existing programs, recreation facilities, and services. Determine public interests, desires, expectations, and priorities for the future including the public’s willingness to fund expanded programs and services.
3. Conduct a trends analysis to project future participation and the needs and issues of “equitable distribution of service and opportunity” for all ages and income levels.
4. Identify specific areas of public need and community interest with regard to program types (sports, outdoor, aquatic, cultural arts, special events, social services, etc.) and demographics and populations served (children, teen, adult, senior, family, individuals with disabilities and the community’s various ethnicities).
5. Analyze and discuss access and opportunity to participate in programs and services with regard to daily/weekly time-frames and schedules, seasonal adjustments, and other factors affecting participation

choices. Make recommendations to improve planning and scheduling effectiveness to maximize opportunity and participation.

Level of Service Standards

Based on the existing park system and the recommendations of the community, the consultant shall establish proposed level of service standards to help guide the development of the park system over the next 10 years.

Provide an evaluation and analysis of current management and operations practices giving specific attention to parks maintenance and staffing with recommendations pertinent to future growth of parklands (consideration should be given to parkland classifications), buildings and facilities, and related services. The plan should project cost-effective funding levels necessary to adequately sustain the recommended levels of maintenance and service in these areas. National Parks and Recreation Association (NRPA) “levels of maintenance standards” should be used to help define recommendations.

Parks and Recreation Strategic Plan

The Parks and Recreation Strategic Plan will be the tool for implementation of the Parks and Recreation System Master Plan for the City’s park facilities and programs, and for the future need of residents. By strategically planning parks, greenways, trails, streets, and public open spaces, connectivity as well as providing recreational opportunities that are relevant to the lifestyles and demographics of the community, the City can enhance the quality of life for present and future generations of neighbors and visitors.

The Plan shall be more of a guide to repositioning the Department to more effectively serve the broader interests of our neighbors and to better accommodate the evolving trends of an urban community. The five-year Strategic Plan will be reviewed annually to assess progress in the implementation of the Master Plan.

Based on the community’s recommendations, the Strategic Plan will establish the overall estimated cost of achieving the proposed level of service; prioritize those recommendations and provide the strategy to implement those recommendations through the Capital Improvement Plan (CIP); include general strategies to be considered through the 10-year Master Plan.

Project Prioritization

Based on the Community Inventory and Assessment, Needs Assessment, and Level of Service Standards, a Project Prioritization List shall be compiled to align with the City of Cooper City program offerings to the community needs. The project list shall be compiled based on priority to cover ten (10) year Master Plan. The project list shall also identify anticipated funding needs.

Recreation Trends Analysis

Parks and Recreation Departments periodically assess societal and local recreation trends to determine how those trends impact existing and projected user populations.

The consultant chosen to prepare the Parks and Recreation Master Plan shall research and identify the unique qualities, geography, demographics, and trends specific to Cooper City that will affect the Parks and Recreation Master Plan considerations for the future. The analysis should also be linked to the Department’s goals and objectives.

Recreation Programming Plan

A systematic and studied approach should be taken in determining the programs and services to be provided by the Department. Programs and services should be based on the conceptual foundations of play, recreation, and leisure; organizational philosophy, mission and vision, and goals and objectives; constituent interests and desired needs; creation of a constituent-centered culture; experiences desirable for clientele; and community opportunities.

The Recreation Programming Plan is an outgrowth of other strategic and program forecasting tools. The Plan includes all elements and services of the Department’s programming functions including activity selection, type and scope of programs and outreach initiatives. Program elements are aspects such as community centers, parks and playgrounds;

programs for all ages, special needs participants, at risk youth, or other special groups; program fields such as cultural arts, fitness, and sports; and leisure opportunities. The Plan also considers the community inventory and complementary potential within the service area.

A Recreation Program Plan provides strategies for developing recreation programs, classes and services to serve the community. The Recreation Programming Plan shall cover a period of five (5) years and contain a current year implementation plan and prioritization. The plan shall address how the Department delivers services to persons of all ages and abilities and how it develops programs. The plan should include the following elements:

1. Program objectives
2. Program and service statistics
3. Program and service determinants
4. Recreation trends analysis
5. Community inventory

The chosen consultant shall review and evaluate current Recreation Programming Plans to determine effectiveness within the community. The consultant shall provide an updated plan including recommended cost effective methods and practices to improve public programming and services in the City.

ADA Transition Plan and Autism Friendly Community

Park and recreation departments can have a major impact on the health and quality of life of citizens with disabilities and play a critical part in encouraging healthy lifestyle choices for all members of the community.

The City of Cooper City embarked on a partnership in 2022 with the University of Miami-Nova Southeastern University Center for Autism and Related Disabilities (UM-NSU-CARD) and the Autism Society of Florida to develop new resources, programming, and employee training to be designated as an Autism Friendly Community.

The City worked closely with UM-NSU-CARD and the Autism Society of South Florida to train both City employees and BSO Cooper City District staff, while also reviewing City facilities and parks for sensory-friendly improvements and more.

The most common access obstacles for individuals with disabilities surround architectural concerns such as whether someone could easily enter a facility's buildings or traverse its open spaces. The focus of this Plan shall be on the evaluation of facilities for compliance with ADA regulations to make park sites and all facilities universally accessible.

The consultant shall develop a phased plan for the removal of barriers at existing recreation facilities, parks, and amenities owned or operated by the Department pursuant to the requirements of the US Department of Justice Title II regulation issued September 14, 2010 and effective March 15, 2011.

The plan shall also include the creation of purposeful, quality services, and equivalent variety of opportunities to welcome individuals with varying abilities.

Community Relations and Marketing Plan

The Community Relations Plan identifies and addresses community needs for all segments of its service population. The community relations plan shall address the following:

1. Community relations policies for the Department
2. Process and procedure for establishing contact with community organizations and other community groups
3. Staff training needs

The Marketing Plan shall be based upon market research. The fundamental principle of marketing is to gain an understanding of customer needs, wants, concerns and behaviors. The marketing plan addresses the appropriate mix of

communications tools to promote agency programs, facilities, events and services and to provide accurate, timely and useful information to the various segments of the target audience. The plan shall include:

1. Marketing objectives
2. Situation assessment, to include:
 - a. Examination of demographic trends
 - b. Economic climate
3. Market coverage by alternative providers
4. Segmentation, targeting, and positioning
5. Marketing mix
6. Marketing methods
7. Evaluation criteria and methods

Research is important to support segmentation, targeting and positioning. Common evaluation methods include surveys, focus groups, customer comment cards, and mystery shopping. Recommended training may include in-service training to ensure effective performance. The community relations plan and marketing plan may be combined in a single document.

The chosen consultant shall review and evaluate current public relations, publicity, marketing, and other promotional efforts to determine effectiveness within the community. The plan shall recommend cost effective methods and practices that will improve public awareness of programs and services.

Community Health and Environmental Responsibility Plan

A healthy community promotes environmental protection, wise use of resources, sustainability and environmental stewardship. Sustainable development practices increase the efficiency with which buildings use resources and reduce impacts on human health and the environment through better siting, design, construction, operation and maintenance.

Public park and recreation agencies create healthy communities and play a fundamental role in enhancing the physical environment. Through facilities, outdoor setting, established policies and services provided improved health for all and foster change collaborative programs and policies.

Such policies help reduce obesity and incidence of chronic disease by providing opportunities to increase rigorous physical activity in a variety of forms. They provide a connection to nature which studies demonstrate relieves stress levels, tightens interpersonal relationships, and improves mental health. These policies also aid in increasing access to nutritious food options and foster overall wellness and healthful habits.

Sustainable planning principles support initiatives with less of an impact on the environment. Green initiatives may include design elements such as alternative storm drainage techniques, rain gardens, and bio-swales designed to capture and filter storm water through a natural plant system before entering rivers and streams. Pavement may be installed that is porous and allow storm drainage to filter into the subsurface soil.

The consultant shall review existing policies and practices and prepare a plan designed to educate park and recreation employees to integrate sustainable practices in daily operations, park projects and improvements, committing to pollution prevention, waste reduction, recycling, resource conservation; teaching employees to be green advocates in the community, promoting community environmental stewardship and sustainability. The plan shall include recommended healthful programs to educate and promote health and wellness to the community, as well as strategies focused on improving access to healthy food and increasing opportunities for physical activity. Topics may include, but are not limited to:

1. Sustainability Practices
 - a. Strategies to protect and conserve natural resources

- b. Best management landscape practices
 - c. Sustainable product purchasing
 - d. Reduction and handling of waste
 - e. Recycling plan for making the process easy and convenient for patrons and employ
2. Fostering the next generation of stewards
 - a. Techniques to engage youth in conservation
 - b. Recommend opportunities to engage volunteers in stewardship
 3. Community Health and Wellness

5.4 SCOPE OF SERVICES

A. Master Plan Document

The scope of this project includes the following:

1. Compilation of the findings and recommendations from above study components into one or more documents which together identify community priorities and define City of Cooper City Comprehensive Parks Recreation Master Plan for the future (10 years).
2. A separate “executive summary” of the Master Plan report shall be provided. An executive summary narrative will be included within all study component documents.

B. Master Plan Deliverables

1. A long-range vision for the City of Cooper City Parks and Recreation Department including specific goals and priorities that incorporate all findings from each of the above study components and particularly reflect community interest and significant levels of support.
2. A well-defined, long-range plan for an integrated network of parks, community facilities, bikeways, open spaces, public places, and corridors for the future; community parks and facilities resource maps that graphically identify the existing and proposed components of this system (this should include identification of park types, future acquisition and development plans, and solutions addressing neighborhood and community access issues).
3. A review and listing of recommendations for the Parks and Recreation Element of a City of Cooper City’s Comprehensive Plan document.
4. A framework for maximizing citizen use and enjoyment of existing parks, facilities, and recreation services.
5. A framework for meeting future needs and achieving long-range parks system development and recreation program services goals.
6. A specific action plan for the next ten (10) years that implements standards, guidelines, policies and recommendations of the Master Plan. This plan should address administration and management as well as maintenance and operations for both parks development and recreation program services.

7. Specific funding recommendations and strategies which support short range (2024 -2029), mid-range (2029-2034), and long-range (2034-2039) parks development and recreation program development needs while responding to the community’s “willingness to pay” attitudes and priorities. Recommendations should be based on specific cost projections identified under parks development goals (particularly the CIP) and project growth of recreational services.

To encourage community-wide involvement, several in-person public input methodologies (e.g. neighborhood meetings, community forums, questionnaires, presentations, focus groups, on-line surveying, newsletters, displays, telephone surveys) should be utilized.
2. The consultant will hold regular consultations with City staff to review progress, present information, and provide recommendations. These meetings will occur as needed, but not less that once a month throughout the project period.
3. The consultant will plan and facilitate public workshops including a minimum of four (4) community meetings as necessary to accomplish comprehensive public input. [END OF SECTION]

SECTION VI - CONSIDERATION FOR AWARD / AWARD PROCEDURES

6.1 EVALUATION COMMITTEE

Proposals submitted will be evaluated by an Evaluation Committee. The Evaluation Committee shall be selected by the City's City Manager.

6.2 REVIEW OF PROPOSALS

The Evaluation Committee will use points formula during the review process to score proposals. Each member of the Evaluation Committee will first score each technical proposal by each of the criteria described in Section 6.3 below. The full Evaluation Committee will then convene to review and discuss these evaluations and to combine the individual scores to arrive at a composite technical score for each firm. At this point, firms with an unacceptably low technical score will be eliminated from further consideration.

After the composite technical score for each firm has been established the sealed dollar cost proposal will be opened and additional points will be added to the technical score based on the proposed price. The maximum score for cost will be assigned to the firm offering the lowest total all-inclusive maximum cost. Appropriate fractional costs will be assigned to other Proposers. Sealed dollar proposals will not be opened until the appropriate time. The Purchasing Division will provide the final rank to the City Manager.

The City of Cooper City reserves the right to retain all proposals submitted and use any idea in the proposal regardless of whether that proposal is selected.

6.3 EVALUATION CRITERIA

Proposals will be evaluated using the following factors. Contractors meeting mandatory criteria will have their proposals evaluated and scored for technical qualification and/or price.

CRITERIA	MAXIMUM POINTS
1. Firm Qualifications and Experience (involving the creation of comprehensive Parks and Recreation Master Plan for municipalities serving similar populations)	20
2. Qualifications and Experience of Key Personnel	10
3. Best Overall Approach to the Scope of Services: knowledge of current trends in park planning and recreational program implementation, resources and availability.	30
4. Price Proposal	30
5. Past Performance including client references and years in business (THE CITY RESERVES THE RIGHT TO CONTACT ANY CUSTOMER OF A PROPOSER REGARDLESS OF WHETHER OR NOT THE CUSTOMER IS INCLUDED BY CONTRACTOR AS REFERENCE)	10
TOTAL POSSIBLE POINTS:	100

Evaluation of proposals will be conducted by an evaluation committee of qualified City Staff, or other qualified persons

selected by the City Manager. The city will conduct a two-step process.

Initial Evaluation 1.1. The city will review each proposal for responsiveness and compliance: Ensure that each proposal received meets all the specified submission requirements, including submission deadlines, required documentation, and adherence to procurement guidelines.

1.2. Evaluation Committee Formation: An evaluation committee will assess and score the proposals objectively, considering evaluation factors, as outlined in the Request for Proposal, and assign scores based on predefined evaluation criteria.

The committee will score and rank all responsive proposals and determine a minimum of three (3) to be finalists for further consideration. In the event there are less than three (3) responsive proposals, the committee will give further consideration to all responsive proposals received. If necessary, the Committee will conduct discussions, for clarification purposes only, with the finalists and re-score and re-rank the finalists' proposals. Proposers or Finalists may be required to provide an oral presentation by appearing before the Evaluation Committee for clarification purposes only. The City may require visits to customer installations or demonstrations of product by proposers as part of the evaluation process.

The City may require additional information and Proposers shall agree to furnish such information. The City reserves the right to award the contract to that Proposer who will best serve the interest of the City. The City reserves the right, based upon its deliberations and in its opinion, to accept or reject any or all proposals. The City also reserves the right to waive minor irregularities or variations to the specifications and in the bidding process.

The City uses a mathematical formula for determining allocation of cost points to each responsive, responsible Proposer. The lowest, responsive, responsible Proposer receives the maximum allowable points. When using this formula, a Proposer that submits a cost or fee which is two times greater than the cost/fee of the lowest responsive, responsible Proposer, will result in receiving zero points for cost.

6.4 FINAL SELECTION

The City Commission of the City of Cooper City will award the Proposal(s) deemed most qualified based on the submittal criteria.

6.5 RIGHT TO REJECT PROPOSALS

Submission of a proposal indicates acceptance by the firm of the conditions contained in the request for proposals unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the City of Cooper City and the firm selected. The City of Cooper City reserves the right without prejudice to reject any or all proposals.

They will send you the Verification of Automatic Exempt Certificate. 3) Provide us a copy of the Verification of Automatic Exempt Certificate.

The CONSULTANT shall not commence nor continue to provide any services pursuant to this Agreement unless all required insurance remains in full force and effect.
