

CITY COMMISSION STAFF REPORT

DEPARTMENT: Commission

DATE: January 14, 2025

SUBJECT: Motion to implement the centralized use of RecTrac citywide for all programming and sports. – **Commissioner Shrouder**

RECOMMENDATION:

Commissioner Shrouder is requesting a motion to implement the centralized use of RecTrac citywide for all programming and sports.

BACKGROUND OF ITEM:

The City of Cooper City online portal currently allows residents to access a range of recreational and sports programming. RecTrac, a comprehensive software solution for recreation management offers centralized capabilities that can improve resident experience and operational efficiency. This motion proposes that all programming and sports activities citywide transition to RecTrac to standardize processes and enhance service delivery.

ANALYSIS:

Adopting a centralized system like RecTrac ensures uniformity in program scheduling, participant registration, and reporting. The software's capabilities allow for:

- Streamlined registration and payment processes for residents
- Centralized data management for City staff
- Improved reporting and analytics for better decision-making

The proposed system will eliminate redundancy, reduce errors, and improve the overall user experience for residents and staff.
