Section 4: First Aid Measures

Description of First Aid Measures

Inhalation	Move victim to fresh air. If not breathing, provide CPR (cardio pulmonary resuscitation). Do Not use mouth-to-mouth if victim ingested or inhaled with substance: give CPR with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Get immediate medical attention.
Skin Contact	Immediately flush skin with running water for at least 15 minutes. (Pay particular attention to folds, crevices, creases, groin). Start flushing while removing contaminated clothing. While in transport continue applying cold, wet compresses. If medical treatment is delayed, repeat the flushing or immerse the affected area in cold water. Creams and ointments should NOT be applied before or during the washing process. Discard heavily contaminated clothing and shoes, otherwise wash clothing separately before reuse.
Eye Contact	Immediately flush eyes with running water for at least 15 minutes. Hold eyelids open during flushing. Get immediate medical attention.
Ingestion	DO NOT INDUCE VOMITING. Never give anything to an unconscious person. If victim is alert and conscious, rinse mouth with water to dilute material. Spontaneous Vomiting: have victim lean forward with head down to avoid aspiration. Rinse mouth and administer more water. Immediately contact local poison control center. Get immediate medical attention.

Most important symptoms and effects, both acute and delayed

Symptoms/Injuries after Inhalation	Material is extremely destructive to the tissue of the mucous membranes and upper respiratory tract.
Symptoms/Injuries after Skin Contact	May be harmful if absorbed through skin. Causes skin burns. Causes skin irritation.
Symptoms/Injuries after Eye Contact	Causes severe eye burns. Causes eye irritation.
Symptoms/Injuries after Ingestion	May be harmful if swallowed.

Indication of any immediate medical attention and special treatment needed

Material is extremely destructive to tissue of the mucous membranes and upper respiratory tract, eyes, and skin., spasm, inflammation and edema of the larynx, spasm, inflammation and edema of the bronchi, pneumonitis, pulmonary edema, burning sensation, Cough, wheezing, laryngitis, Shortness of breath, Headache, Nausea, Vomiting, Pulmonary edema. Effects may be delayed, to the best of our knowledge; the chemical, physical, and toxicological properties have not been thoroughly investigated.

Section 5: Fire-fighting Measures

Suitable extinguishing media

Small Fire

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Large Fire

Flood fire area with large quantities of water while knocking down vapors with water fog. If insufficient water supply, knock down vapors only.

Unsuitable extinguishing media

No information available

Special hazards arising from the substance or mixture

Non-combustible
Hazardous combustion products: Releases of sulfur dioxide at extremely high temperatures.

Special remarks on Fire Hazards

Not flammable but highly reactive. Strong dehydrating agent, which may cause ignition of finely divided combustible materials on contact.

Special remarks on Explosion Hazards

Reacts violently with water with the evolution of heat. Reacts with most metals, especially when diluted. Hydrogen gas release (extremely flammable, explosive).

Protective actions fire-fighters

Wear standard protective equipment, self-contained breathing apparatus and full fire-fighting gear. Runoff from fire control may cause pollution. Neutralize run-off with lime or soda ash.

Further information

Use water spray to cool unopened containers.

Section 6: Accidental Release Measures

Personal precautions, protective equipment, and emergency procedures

Do not touch or walk through spilled material. Do not breathe vapor or mist. Provide sufficient ventilation, use respirator if ventilation is not satisfactory. Wear proper personal protective equipment (see Section 8).

Environmental precautions

Prevent further leakage or spillage if safe to do so. Prevent spills or contaminated rinse water from entering sewers or watercourses. Inform the local authorities if the product has caused environmental pollution.

Methods and materials for containment and cleaning up

Small Spills: Absorb with dry materials such as earth or sand. Place in a chemical waste container.

Large spills: Dike the spill with earth or sand if possible. Restrict access to area until completion of clean up. Ensure trained personnel conduct clean up. Use proper personal protection equipment (see Section 8). Prevent liquid from entering waterways or sewers. Collect into plastic containers for disposal. Call emergency services. Comply with Federal, Provincial/State and local regulations on reporting releases. (For disposal reference section 13).

Announcement of Merger and Corporate Name Change

We are thrilled to announce a significant milestone in the evolution of our company. **Effective April 1, 2025**, LLC ("Saconix") has officially merged into Sulphuric Acid Trading Company, Inc. ("Satco") legal entity. As part of this exciting development, the two companies will rebrand as **Interacid North America, Inc.** under Interacid Group. Interacid North America, Inc. will continue to honor all obligations of SATCO and Saconix and seek to further enhance its services through this merger.

SATCO and Saconix are both wholly owned subsidiaries of Sumitomo Corporation of Americas ("SCOA"), the largest subsidiary of Sumitomo Corporation, one of the world's leading integrated conglomerates with a vast network of offices and portfolio companies globally.

Saconix is an industry-leading distribution and logistics partner for sulfuric acid and other industrial chemicals with strategically located assets across North America. Like SATCO, Saconix is known for its reliability and high quality of service.

SATCO has imported and distributed sulfuric acid in the United States for over 30 years, initially operating out of its Port Tampa Bay marine terminal, then expanded its operations in 2019 with the opening of its new import terminal located at the Port of Stockton in California.

We believe this merger will benefit all stakeholders because it allows us to combine our strengths and maximize operational efficiency. As subsidiaries of SCOA, SATCO and Saconix share core values and commitments rooted in safety, exceptional service, a strong financial foundation, and unrivaled access to the global marketplace through Sumitomo Corporation's extensive network.

Key Benefits of the Merger:

- **Maintain Relationships with Local Contacts:** You will continue to work with the same local point of contact you know and trust, while benefiting from our expanded global network.
- **Access to Technological and Intelligence Resources:** Our combined resources will provide you with cutting-edge technology and intelligence to support your business needs.
- **World-Class Logistics and Tank Operations:** We are committed to delivering excellence to our customers across every touchpoint, ensuring the seamless transport, storage and delivery of sulfuric acid. The joining of these two companies increases our footprint and facilities.

Going forward, our email addresses will change to a naming convention of [first initial].[last name]@interacidna.com. Otherwise, our operations will remain unchanged and continue from our current offices.

If you have any questions about this exciting news, please contact Info@Interacidna.com.

We are grateful for the opportunity to serve your business and grow together. We are confident that this merger will benefit all of us and look forward to continuing our successful partnership.

Thank you for your continued support.

Very truly yours,

Brent Shonka

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).
