

Ground monument sign examples with [new proposed code](#). Signs have a matching background color on tenant panels, but lettering can match the center sign package colors and approved trademark logos.

Ground monument sign examples limiting tenant panels to a single color lettering and matching backgrounds. **More restrictive than new proposed code** changes but results in a very “uniform” look.

Ground monument signs allowing tenant panels to have different color lettering and different color backgrounds. Examples are very “flexible” for the centers but do not have any sort of uniformity and look more “distracting” to drivers.
