OVERVIEW

The **CLAIRITY** mobile-apps from Acuity Controls, allows validated end users (electrical contractors, sales agents, or facility maintenance professionals) to startup, configure, and troubleshoot nLight® AIR wirelessly from a compatible smart phone or tablet. The **CLAIRITY** app is optimized for efficient onsite startup and maintenance activities. It allows end-users to easily modify the settings and operation of the fixtures, sensors, and wall switches in a group, aiding in meeting energy code requirements. For larger installations, multiple users may use the **CLAIRITY** mobile-app simultaneously to reduce onsite time. Leave the ladder and laptop in the truck!

Using Bluetooth® Low Energy (BLE) communications, users configure groups with fixtures and controls without the need for proprietary hardware programmers or TV-like remote controls. Utilizing a simple, visual interface, that provides real-time feedback, configure the equipment to work together for a consistent look or allow each fixture to operate independently.

No Wi-Fi? No cellular service? No problem. We know the wireless IT infrastructure is often not in place during a startup. Once you're logged into your site, you can use **CLAIRITY** completely offline. And once your mobile device senses a connection to the internet, all of the configuration parameters will be backed up in the cloud.

Compatibility with non-default, third party SIMs is not guaranteed or warranted.

CONNECTIVITY PLANS

Remote support via the CLAIRITY Link solution is enabled through a connectivity plan (REMCONN). Purchase of a CLAIRITY Link router includes an initial 12-month Ethernet connectivity plan that begins upon shipment of hardware from the factory. For extended periods of connectivity, or for cellular connectivity, supplementary plans can be purchased. Flexible plans are offered in 3-month to 24-month durations and can be purchased at any time.

FEATURES
